

Winning a bet with a friend, your team winning the World Series, making a smart stock investment at the right time...in each of these cases, you're a winner. In one of these situations, you are punished for succeeding. When you sell that stock, you'll be assessed a significant tax that has now appreciated significantly above your initial cost. Many of our alumni have found the advantages of using a Charitable Gift Annuity to beat the taxman. Since announcing our Charitable Gift Annuity Program, we have written almost \$1 million dollars in charitable gift annuities. Their reasons for doing so are almost identical. We thought you would enjoy hearing about one Delt's experience.

t Chrysler Corporation, I was involved as a physician in the treatment and recovery of employees whose use and abuse of alcohol and drugs was an addiction. Later, I was on the Board of Trustees of Brighton Hospital in Brighton, Michigan where addictions are treated. Not only did I see the lost productivity of our employees, but also witnessed the ravages that alcohol abuse caused them. During this time, I went to a conference where Dr. Joseph Pursch was a featured speaker. He.

and a lady by the name of Betty Ford among others, went on to form the Betty Ford Clinic for drug and alcohol addiction. What I learned from this man was that something could be done for people suffering from drug and alcohol abuse. That is, if each of us will make the effort, together we could make a change.

I have been impressed that the Fraternity has taken the same attitude with their *Delts Talking About Alcohol* program. With today's binge-drinking problem on campus, ignorance of this problem can be deadly. Although I have been a supporter of the Foundation through my annual DeltFund donation, I wanted to do something more. In the spring issue of the *Horizons Newsletter*, I read about the Foundation's Gift Annuity Program. I was looking for some vehicle that would allow me to convert some highly appreciated stock to a form to avoid some of the capital gains taxes. I owned some New England Electric stock for a

number of years. The company was being sold outright to a UK Company which was paying cash for stock shares, thereby forcing cash payment instead of stock in any new company. I had a tax problem.

By gifting these shares to the Delt Foundation in exchange for a Charitable Gift Annuity, I was not only able to avoid some of the capital gains, but also received a charitable deduction. In addition, I was able to unlock some cash flow for my wife, Betty, and myself for our retirement. Also, at our ages, we were able to get a return of 7.5% with guaranteed payments for the remainder of both of our lives.

Everybody's situation can be different, but if any of my comments rings true for you, I hope you will consider a charitable gift annuity. The process the Foundation staff led us through was straightforward and simple. Since Betty and I like to travel, they have even arranged for automatic deposit of checks into our account. For alumni who are looking for a way to do more, this may be your answer. We are happy to be able to do it and hope other alumni will join us."

> —William L. Knapp, M.D. Michigan '44

- unlocking value from highly appreciated securities and increasing cash flow for retirement
- avoidance of some capital gains tax
- removing assets from your estate
- a charitable deduction
- supporting an organization in which you truly believe

Some innovative alumni have even used the cash flow to purchase wealth replacement insurance to take care of children and grandchildren which would have otherwise benefited from assets that had been used for a gift annuity, while at the same time avoiding gift and estate taxes. In many cases, you can increase the amount of assets that are passed on to your heirs through proper estate planning. At the very least, you can reassign some of the taxes that your estate would have had to pay and turn them into charitable gifts to support organizations which have benefited you throughout your life. Our proposals are easy to understand and provide a special section for your own financial advisors.

At the Delt Foundation, we are not tax experts; however, we can discuss options with you that you may then wish to take to your own estate planners to see how they might effectively fit into your overall estate plan. You have spent your whole life accumulating assets and, at the Delt Foundation, we believe you should retain the power to decide ultimately how they are distributed. If you

would like more information or a specific proposal prepared for you, please contact:

Kenneth A. File, Executive Vice President Delta Tau Delta Educational Foundation 11711 N. Meridian St, Ste 100, Carmel, Indiana 46032 Tel No: (317) 818-3050 Fax No: (317) 818-3060

"Neither the author, the publisher, nor this organization is engaged in rendering legal or tax advisory service. For advice or assistance in specific cases, the services of an attorney or other professional advisor should be obtained. The purpose of this article is to provide accurate and authoritative information of a general character only. Watch for tax revisions. State laws govern wills, trusts, and charitable gifts made in a contractual agreement. Advice from legal counsel should be sought when considering these types of gifts. May not be available in all states. Check with your professional advisor."

Nost Influential Delts 20th Century Century

oliticians. Scientists. Explorers. Titans of Industry and Commerce. Men of the Cloth. Men of Letters. Authors. Athletes. Artists. Since the turn of the last century. Delts from all walks of life have left their marks on their community, their country, the world...even the cosmos. A feature such as this, by necessity, is exclusive. During the last 100 years, Delta Tau Delta has simply produced too many people with significant personal accomplishments and contributions for everyone to be included. So how was this list compiled? Volunteers sifted through 100 years of back issues. surfed the Web and consulted with alumni young and old to determine not just prominence but legacy—a lasting influence of some sort that made the world better...or at least different...because they were here. In the process of developing this article, we found some rather obscure alumni credited with some not-so-obscure contributions. And when we were through, we held our heads a little higher because, as an entity in and among themselves, the collective contributions chronicled here have changed the world. Yet, despite days of objective research, it is highly probable that we've missed someone who truly deserved to be among those included on this list. We hope that, through your efforts, we will be able to "correct the record" and report those cases in subsequent issues. As we pause on the eve of a new millennium, we can't think of anything more fitting than a journey back through time to get "up close and personal" with 100 of the century's most influential Delts. We hope you'll find this as inspiring and fascinating as we did.

KERRY B. HARDING, EDITO

Abel, Bill, Texas Tech '71, a selfproclaimed "wild well guy" and president of Houston-based Abel Engineering/Well Control gained international recognition for his efforts in extinguishing the 500 oil fires ignited in Kuwait from Operation Desert Storm bombing.

The Kuwaiti government chose Abel's firm because it offered petroleum engineering experience

along with a track record of successful firefighting. In a career that took him from blowouts in south Texas to the North Sea, Indonesia, Africa, Saudi Arabia and China, Abel has witnessed some horrendous fires and damage. One of his other assignments, the Mexican government oil company's 1986 fire in the Gulf of Campeche, was the biggest fire in North America in the past 50 years.

Allen, Henry J., Baker 1891, served as Governor of Kansas, United States Senator and newspaper editor and publisher. He began his newspaper career in 1894 as editor of The Manhattan Nationalist and later owned and published several other Kansas newspapers until 1907 when he acquired the Wichita Beacon. During W.W. I, he went to France under the auspices of The Red Cross to organize its home communication service. While abroad he was elected Governor of

Kansas, serving until 1923. In 1924 he was named a special commissioner to investigate the Near East Relief and traveled in Southern Russia. Armenia, Syria, Turkey, Greece,

Palestine and Iraq. He served as special advisor to the state department in Washington on the preparation of the treaty between the United States and Canada governing the development of the St. Lawrence

River and the Great Lakes for navigation and power. In 1928, Allen was appointed to fill out the unexpired term of Charles Curtis who had been elected Vice President Later, he served as president of the Reconstruction Finance Corporation and as president of the Baker Board of Trustees for almost 20 years.

Anderson, Harrison R.

Kansas State '11, served in the highest office of the Presbyterian Church, that of Moderator. As the pastor of the Fourth Presbyterian Church of Chicago on the affluent Michigan Avenue, Anderson presided over a congregation of 3,000 transients and visitors including many young people from nearby professional schools. The new Moderator began his post-college career not as a minister but as an engineer. Graduating from college at 18, he went to work on the Los Angeles Aqueduct in the Sierra

Mountains. Upon completing that project he entered Chicago's McCormick Seminary.

When the US entered W.W. I, he volunteered as a chaplain, serving with the 103rd Infantry in France. Dr. Anderson was a leading advocate of the movement to reunite the nation's two largest Presbyterian bodies-the Presbyterian Church USA and the Presbyterian Church US, a southern body which split form the main group at the time of the Civil War. He traveled the South extensively, speaking in many pulpits. In 1948 he represented the Presbyterian Church USA at Geneva and was an alternate at the World Council of Churches meeting in Amsterdam. Of him it was said that "He has given himself to providing a personal ministry to a congregation of rich and poor in the heart of a great city. Even though he is rarely absent form his pulpit, he has found time to conduct missions in various parts of the country and to

speak to students in many colleges."

Austin, Ken, Oregon State '54, also received Rotary International's highest honor for his contribution to the world community with "Rota-dent," a program which provides portable dental equipment to dentists who volunteer their services in remote areas of the world.

Through the years, the program sent out hundreds of dental units, reaching areas in the world where dental

health care was once an impossibility. After developing the Air Vacuum System, Austin and his wife, Joan, founded A-dec, Inc., an Oregonbased pioneer in the world of innovative dental equipment, which has sales in more than 100 countries.

Bannerman, Francis VII.

Cornell 1899, became the heir to the Bannerman's Island Arsenal on the Hudson River and the Bannerman Military Museum located at 501 Broadway during the 1930s. Bannerman sprang from a

hardy Scots line, the ancestor of the clan Macdonald, who distinguished himself in the battle of Bannockburn

by rescuing a clan pennant. The warrior was rewarded by the redoubtable Robert Bruce who cut the streamer part of the flag from the national St. Andrew's cross, wrapped it around the hero and pronounced him henceforth a "Bannerman." Francis Bannerman V brought his family to the US in 1854. The Bannermans started buying used and obsolete materials at navy auctions. At the close of the Spanish American War, Bannerman & Sons purchased from the United States government 90 percent of the captured Spanish arms and supplies. This transaction led the Bannerman family to buy Polopel's Island in 1900. The Island was ideal for storage of munitions-convenient to shipping, isolated enough to minimize the danger of disastrous fire or explosion. On the island, Francis VI built his family estate and extensive warehouses, all designed on the style and scale of the medieval castles of Britain's Glamis, Holyrood and Warwick.

Barkley, Alben W., Emory 1900, long familiarity with national affairs, his integrity, his patriotic zeal, his courage and loyalty and his eloquence...gave him exceptional equipment as a legislator and a leader, culminating with the

appointment as Harry Truman's feisty vice president. A brilliant man, he enrolled in college at age 14

and was elected county attorney at 28 and county judge at 32. He served as a member of the House of Representatives from 1913-1929 before his election to Senator in 1927. During the stormy years in the late 1930s when the tremendous power of the New Deal began to buckle, he served as the Democratic leader of the U.S. Senate, holding the post longer than any other man, and had the honor of being keynoter at three Democratic National Conventions and chairman of the fourth. In 44 years of public service, he suffered only one defeat and that was in a party primary, not an election.

Belli, Melvin M., UC Berkeley '29, became a larger-than-life San Francisco lawyer dubbed the "King

of Torts" for his historic and often flamboyant contributions to American law. In his heyday, Belli was a giant in the law and the courtroom. From the 1940s through the 1960s. he led the way in modernizing the law by expand-

Most Influential 2 20th Century

ing the rights of people to sue rich and powerful defendants. He invented and promoted new courtroom techniques in civil lawsuits through the use of gory, graphic evidence and expert witnesses to win multi-million-dollar verdicts. He also practiced criminal law, representing such celebrated defendants as Jack Ruby, Carvl Chessman, Sirhan Sirhan, Lenny Bruce and Mario Savio. Other famous clients included lim and Tammy Fave Bakker, The Rolling Stones, Martha Mitchell, Lana Turner, Mae West, Errol Flynn, Jimmy Durante and Tony Bennett.

Bemer, Robert W., Albion '40, known as the Father of ASCII (American Standard Code for Information Interchange), this became the standard alphabet and symbol code inside personal computers, replacing Morse Code and

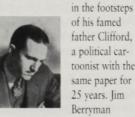

the Baudot Code of telegraphs and teletypewriters. The most powerful element of ASCII is the Escape character, found in the upper left-hand cor-

ner of most keyboards. It is also used as a preface to "escape sequences" which Bemer invented in 1960 and put into the public domain. Everywhere a PC is used, at least half of the action consists of escape sequences. Microsoft's Windows depends entirely upon escape sequences, even to the icons. Such usages of Bemer's escape sequences are for physical hardware, but for the information highway there are logical standards. At his suggestion a body in Geneva, Switzerland registers sets of symbols as alternates to the coded characters of ASCII. Examples are Arabic, Chinese, Cyrillic, symbols for the blind, music, engineering, cinema, construction, etc. Bemer's computer career began in 1949 as a programmer for RAND Corp., ultimately going on to positions at Lockheed, Marquardt, IBM, Univac, GE and Honeywell. With over 100 published papers, Bemer was the first to do 3-D perspective by computer, the first to describe computer timesharing and the creator of the name COBOL. In recent years, he was brought out of retirement as one of the few consultants with the expertise to remedy the Y2K computer problem.

Berryman, lames T., George

Washington '24, started his career as a sports cartoonist with the Washington Evening Star, following

father Clifford, a political cartoonist with the same paper for 25 years. Jim Berryman

became the only cartoonist ever enlisted by the FBI to aid it in apprehending criminals. When every police organization in the country was seeking the Lindbergh kidnapper, Berryman drew a sketch of the perpetrator of that crime from descriptions furnished by the man who paid the ransom money and the only man who actually saw the kidnapper. The sketch was such a striking likeness that it led to the apprehension of Bruno Hauptmann who was not even considered a suspect. When Charles Fletcher Mattson of Tacoma, Washington was kidnapped, I.Edgar Hoover sent Jim Berryman there to make a sketch from the descriptions provided by the other Mattson children.

Brennan, William J.,

Pennsylvania '28, as a Supreme Court Justice appointed by President Eisenhower, became known as the

Lion of Liberty, playing an historic role in shaping much of the country's legal and social agenda. During his 34 years on

the court, Brennan pushed his colleagues to take on a variety of social issues and was widely recognized as

the chief strategist behind the court's civil rights revolution. He was the architect of rulings that expanded rights of racial minorities and women; led reapportionment of voting districts guaranteeing the ideal of "one person, one vote," and enhanced First Amendment freedom for newspapers and other media. A strong opponent of the death penalty, he and Justice Thurgood Marshall continued to author dissents, viewing it as "cruel and unusual punishment." A strong proponent of Constitutional liberty and the sanctity of the Bill of Rights, he believed the protection of the dignity of the human being and the recognition that every individual has fundamental rights which government cannot deny him.

Brown, Louis, A., Jr., MIT '17, was one of the most well-known architects of his day. After a brief interval of war service, Brown engaged in engineering and construction in Fort Worth, Texas and New York City, became chief draftsman and office manager for William Van Alen, for whom he made the first set

of sketches for the Chrysler Building. He joined the New York firm of Pruitt and Brown, becoming the architect

for Childs' restaurants in several Eastern cities. At the peak of the depression he expanded his business to include Charlottesville, VA as well as New York and produced the spectacular West Coast night club, Omar's Dome. At the New York World's Fair, he designed Heineken's Aan De Zuiderzee, the Dutch Village restaurant which seated a thousand people in and out of doors and The Virginia Room, the dignified official exhibit of The Commonwealth of Virginia. He served as a consulting architect to the International Fraternity for a decade, designing 14 chapter houses and developing the Building Manual for Chapter Houses.

Burns, Robert M., Colorado 15, received the Perkin Medal to honor his outstanding achievement in American industry chemistry.

Chemical Director of Bell Telephone, he was responsible for all research work in the field of chemistry performed

in the Bell System. His accomplishments included important applications of chemistry to problems of the communications industry, notably in the control and prevention of corrosion, the development of cadmium lead batteries and electrolytic capacitors, the solution of metallurgical problems of the industry, the development of ceramic and high polymer insulating and structural materials, the artificial growth and utilization of large piezo-electric crystals for the control of electronic circuits and the development of methods of instrumental and microanalysis required in these fields.

Butler, George A., Iowa '23, was one of Houston's top lawyers for more than half a century. He made his mark holding companies together during the Depression days of the 1930s, then founded three Houston banks and served on their boards as well as those of other institutions including the state Democratic organization. But his distinction came from efforts in his seventies on behalf of Washington-

on-the-Brazos, On that site, a group of men gathered more than 160 years ago to sign the Texas Declaration of Independence from Mexico, Butler led

the movement to reconstruct the small frontier settlement that was there. The park, located five miles from Butler's 700-acre cattle ranch. featured a museum, auditorium, a replica of Independence Hall and the rebuilt home of Anson Jones, president of the republic from 1844-

1846. The rebuilt settlement, comprised of 13 buildings, most of them log cabins, were completed in 1977.

Butt, Archibald W., University of the South 1888, became a legend

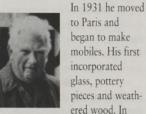

and his name has long been synonymous with heroism. He is credited with starting the college newspaper at Sewanee, beginning his post-college career as a reporter for

Louisville and Macon, GA newspapers, and was soon sent to Washington as correspondent for several Southern papers. He was secretary to the U.S. Ambassador to Mexico, quartermaster captain in the Spanish American War, head of the quartermaster depot in Washington, and in 1908 he became the first Military Aide to a U.S. President, serving under both Theodore Roosevelt and William Howard Taft. On April 15, 1912, he was aboard the fabulous Titanic when it rammed an iceberg and floundered helplessly in the North Atlantic. While countless passengers and crew members gave way to blind panic, Butt, with his characteristic coolness and dignity, directed the loading of life boats, insisting that women and children disembark first. It was he who forced the terror-stricken members of the band to play the hymn. His calm command of the situation and his bravery were responsible for averting an even greater loss of life. The story of how he remained on the Titanic to the last and smilingly said to the passengers of the final lifeboat as it was lowered over the side, "Remember me to the folks at home," was carried in every newspaper in the country. His was memorialized through the Butt fountain on the White House grounds, a statue in Arlington Cemetery, a statue in England, and a bridge in Augusta, GA. His White House portrait now hangs in the office of Delt Congressman Chris Cox.

Calder, Alexander, Stevens

Institute of Technology '19, was one of the great artistic innovators of the twentieth century. He worked with numerous media and invented radical new sculptural forms, the most notable was the mobile. Throughout his life, Calder continuously explored new and exciting ways to move not only art, but the human spirit as well. The enormous breadth of Calder's career ranged in size from small-scale to monumental. Calder's remarkable ability to invent new artistic forms was grounded in his skills as an engineer and his undertaking of technology.

to Paris and began to make mobiles. His first incorporated glass, pottery pieces and weathered wood. In

1975, Calder received the United Nations Peace Medal. His public collections can be found at the Art Institute of Chicago, Los Angeles County Museum of Cout, the Museum of Modern Art in Denmark, the Metropolitan in New York and other major museums in France, Sweden, Israel, Germany, Cuba and others. Shortly after a major retrospective on his work was presented at the Whitney Museum of American Art in New York, he died in 1976. In 1998, in honor of the 100th anniversary of his birth, a major exhibition on Calder's life and work was assembled at the National Gallery of Art in Washington, DC.

Campbell, Thomas D., Cornell

'05, became king of wheat farmers and the world's best-known champion of industri-

alized agriculture. Born in a sod hut on what is now the University of North Dakota campus, by the time he was 17,

he managed his family's 4,000 acre farm and attended college at the

same time. As operator of the biggest privately owned wheat farm on earth (65,000 acres near Hardin, Montana), he convincingly demonstrated the effectiveness of industrial methods and modern machinery applied to farming. In 1947, he harvested a half million bushels of wheat worth one and a half million dollars, an all-time record. During W.W. I, with an acute food shortage facing the nation, he laid before the government a plan for largescale wheat growing on hitherto untilled land in North Africa and on American Indian reservations, securing a \$2 million loan from financier J.P. Morgan to make the deal happen. A veteran of W.W. I, Campbell entered W.W. II at the request of General Marshall, serving in every theatre around the globe. Inventor of the fire bomb which U.S. airmen used to annihilate enemy targets with masses of blazing petroleum jelly, he was awarded the Legion of Merit and, by the end of the war, had been promoted to Brigadier General. Soviet Russia twice enlisted his aid to step up the grain yield of the soil and in 1947 and 1948, French and Tunisian officials traveled to Montana to observe his revolutionary techniques.

Carpenter, M. Scott, Colorado ' 47, has the unique

distinction of being the only human ever to penetrate both inner and outer space, acquiring the dual title Astronaut/

Aquanaut. Carpenter was selected as one of the original Mercury 7 Astronauts on April 9, 1959. He was the backup pilot for America's first manned orbital space flight. On May 24, 1962, Carpenter became the second American to orbit the earth by piloting his Aurora 7 spacecraft through three earth orbits. After his historic flight, on leave of absence from NASA, Carpenter was an Aquanaut Team Leader in the Navy's Man-in-the-

Sea Project spending 30 days living and working on the ocean floor, at a depth of 205 feet, as part of the Sealab II program. Upon returning to his NASA duties, Carpenter was active in the design of the Apollo Lunar Landing Module and underwater extra-vehicular activity crew training. In 1967, he returned to the Navy's Deep Sea Submergence Systems Project as Director of Aquanaut Operations during the Sealab II experiment. Currently Carpenter is an active author, public speaker and consultant on ocean and space technology programs.

Case, Charles C., West Virginia '36, retired in 1971 as commander of the Defense Fuel Supply Center in Alexandria, VA. The fact that Case rose to the rank of major general, in the Army, well described the calibre of his service to the nation, both in time of war and in time of peace. His career took him to many lands and to many positions of leadership for the nation. For 34 years Major General Case served in the Philippines and India during W. W. II and in Korea during the Korean War. In the mid-1960s, he was quartermaster of the U.S. Army in Europe and Chief of the Army Supply and Maintenance Agency. He was also deputy commanding general of the communications zone in Europe, receiving five Distinguished Service Medals, five Legions of Merit, a Bronze Star, and Army Commendation Medal.

Chamberlain, Herbert E.

Albion '16, was, at the pinnacle of his career in the late 1940s, considered one of the country's foremost psychiatrists, a man whose counsel was so widely sought that to keep

his appointments he had flown over 270,000 miles. The states of Oregon and Nevada engaged him as a consulting psychiatrist for their departments of social welfare and, every month, spent a solid week each with public and private health agencies throughout

8 Vol.124 No.1

Most Influential Delts of the 20th Century

California. He was sent by the U.S. State Department and the Federal Security Agency's U.S. Children's Bureau on a mission to the Philippines, A leading thinker of his time, he believed that the greatest casualties of war were mental ones and believed that the full effects of WWII would not be felt until its participants reached their elderly years. During his career he wrote pamphlets and monographs and spoke before conferences of social work in 30 states. On his right hand he wore an Olympic ring, given to him by a patient who, after being treated by Dr. Chamberlain, went on to win the world weightlifting championship.

Crile, George W., Wooster 1892, a famous surgeon and physician, will long be remembered for

his significant contributions to medical science. His animal experiments in the field of shock treatment were the first ever conducted. His "block anesthesia" set

the medical world on the right path to positive prevention of a treatment for the one-time great killer, shock. One of his office associates, working in collaboration with him, performed the first operation in the country in which the patient received spinal anesthesia. As senior consultant of surgical research in W.W. I. he administered the first of millions of transfusions which accounted for a tremendous saving in human life. By 1920, thanks to his efforts, transfusion became the standard treatment for shock and hemorrhage in every hospital in the world. President in 1916 of the American College of Surgeons, he was the first to discover that adrenaline could be used to revive a heart that had ceased to beat. As early as 1904 he used the treatment successfully to save a human life. In 1920 he and three colleagues built the famous Cleveland Clinic, Much of his fame came as a result of the countless thyroid operations he performed. His research and medical skills made the dreaded exophtalmic goiter a frequently curable disease.

Christie, Howard J., *California* '34, was a renowned producer/director from the mid-1930s to the late 1960s. He served as associate producer on several Deanna Durbin films, then produced *Lady on a Train* (1944), *Abbott and Costello Meet the Invisible Man, Away All Boats, Gunfight at Abilene* and *Nobody's Perfect* (1968). He produced and co-wrote *Abbott and Costello Go to Mars* and was involved with television's long running series *The Virginian*.

Clark, Champ, *Bethany* 1873, was the central figure in one of the stormiest Democratic National Conventions in history. In 1912, at Baltimore, he led the field of presidential candidates on 29 ballots, receiving a clear majority on nine, but the old two-thirds rule of Democratic Conventions denied him the nomination. Spearheaded by Williams Jenning Bryan, the opposition deadlocked the Convention for a solid week, finally compromising on Woodrow Wilson, at that time a relatively obscure figure. Becoming

president of Marshall College at the age of 21, he later practiced law in Missouri and in 1893, embarked upon a long political

career during which he was, for 24 years, a member of the House of Representatives and its speaker for four Congresses. Familiarly known as "The Speaker" he refused the Vice Presidential nomination and an appointment as Senator, preferring to remain as Speaker.

Clark, Melville, *Syracuse '04*, was a world-famed harpist, inventor, author, merchant and nationally known authority on rare musical instruments. Clark studied at the Royal Conservatory, in London and Paris, under famous harp instruc-

tors. At the height of his career in 1951, he had played more than 4,000 performances in America, Canada and Europe. He appeared many times in the White House during President Woodrow Wilson's tenure, and he played there again for President and Mrs. Franklin Roosevelt. He enjoyed the distinction of appearing on the first harp telecast for NBC. An exceptional merchant, his inventive mind

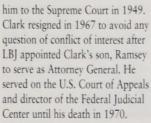

accounted for many advancements in his field. A member of the Inventor's Congress, he invented the Clark Irish Harp

and a harp made of plastic and nylon which was impervious to weather. He devised improvements which made possible a perfect portable harp and developed the nylon harp string. He is credited with inventing the aero-station, adopted and used by the British Government to distribute information over Germany during WWI. Several years ago, he received a citation from Admiral Byrd "for contributing to the success of the first Expedition to the South Pole."

Clark, Tom C., *Texas* '21, was the son of a prominent Texas politician and was active in Texas Democratic politics. He joined the Justice Department in 1937 and served as civilian coordinator of the forced evacuation of Japanese-

Americans from the West Coast during W.W. II. President Harry S. Truman appointed Clark Attorney General in 1945 and nominated

Among his writing for which he was most famous was Administrative Law, Constitutional Adjudication and the Supreme Court and American Bar Association Standards for Criminal Justice: Prescription for an Ailing System.

Clark, Kenneth H. J., *Toronto* '36, became the first Delt to receive Canada's most prestigious honor from the Queen of England. Clarke graduated in metallurgical engineering before attending the National Defense College in Kingston. He began his career as a chemist for the International Nickel Company of Canada and advanced rapidly through positions with other leading industrial firms in the nickel, silver, copper and brass are-

nas. During W.W. II, he was chief of the Allocations and Conservation Division of Non-Ferrous Metals Control in the Department of

Munitions and Supply, and also administrator of primary non-ferrous metals in the Wartime Prices and Trade Board in Ottawa. He served on the Combined Production and Resources Board and the International Material Conference in Washington, DC, then as Chairman of the Metallurgical Advisory Committee of the Department of Defense Production in Ottawa. He was a delegate to many United Nations conferences in London, New York, Moscow, Caracas and Geneva. He served as chairman of the board of Simon Carves Ltd., a UK-based multinational design and consultant firm, chairman of Kaysea Consultants and an advisor to the Royal Mint.

Coburg, Andreas M., *Louisiana* State '65, became one of a handful of men ever to hold fraternity membership as a member of a royal family. Prince Andreas is heir apparent to the Duke of Coburg dynasty and cousins to the current ruling royal families of Sweden, Denmark, Spain, Norway and England. His

ties to the latter go back to Prince Albert of Saxe-Coburg-Gotha, Oueen Victoria's husband and brother of Ernst II, the reigning Duke of Coburg in 1840 and Prince Andrea's great grandfather. Coburg left LSU after being forced to choose between his German and American citizenship and returned to the family seat to take his place as head of the family business-overseeing the timber harvesting of nearly 100,000

acres of forest and heading the family foundation which oversees the family's ancestral castles in Coburg, and Thuringen. Germany, and Grein,

Austria as well as truly priceless collections of art, silver, and manuscripts dating back 1,000 years. In his current capacity he oversees the well-being of thousands of inhabitants of the small villages which dot his family's estates and serves in many public civic and, like many other royal family members, serves in a variety of ceremonial capacities throughout the year.

Cooper, Charles P., Ohio State '07, through hard work and achievement, experienced a meteoric rise in the telephone industry, becoming the vice president of AT&T and guiding the finances of what was then the world's largest

corporation. In 1918, Cooper was temporarily transferred to Washington, DC to assist the Chesapeake and Potomac

Telephone Company in meeting the urgent needs for wartime expansion of telephone facilities.

Cox, Christopher, University of Southern California '73, was first elected to Congress by California's 40th District in 1988 after serving in the White House as Senior Associate Counsel to President Ronald Reagan. Before going to Washington, Cox clerked with an

appellate court, then became a partner in the firm of Latham and Watkins, specializing in corporate finance. In the Reagan White House, Cox was assigned the

range of policy matters including writing a new budget law and serving as an advisor to the President on

judicial selections, including the nomination and confirmation of two Supreme Court Justices.

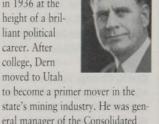

Crowell, Lucius A., Iowa '04, developed what was, at the time, considered one of the greatest strides in modern technological development-the magnetic wire

Developed by Crowell while at the Armour Research Foundation in Chicago, the invention trans-

ferred sound recordings to a piece of .004 inch wire which could not be worn out, scratched or chipped. The Wire Recorder Development Corporation was organized by IIT to handle all licensing negotiations, provide special facilities for recording companies, assure wide distribution of both recorded and blank wire magazines and expedite the program. Under the auspices of the corporation, fifteen manufacturers in the United States and abroad were licensed to produce the wire recorder. In its early days, the Army and Navy gave the wire recorder a literal test under fire on widely scattered battlefronts. Among the many uses which it served in the war effort was the recording and dropping by pilots of verbal instructions and observations that could not be entrusted to radio at their headquarters where they could be reproduced. With the development of a pocket model capable of recording any conversation without the speaker's knowledge, the public envisioned that, it would revolutionize the field of reporting as well as in the educational world to facilitate academic note taking during lectures. They were also envisioned as an early telephone answering machine which could take calls during the night.

Dern, George H., Nebraska 1894, served as FDR's Secretary of

War from 1933 to 1936, he died in 1936 at the height of a brilliant political career. After college, Dern moved to Utah

eral manager of the Consolidated Mercur Gold Mines, which in those days operated the largest gold mine in Utah, and he was co-inventor of a roasting process for the reduction of refractory ores. In 1924 he entered politics and was elected Governor of Utah on the Democratic ticket at the same time that Calvin Coolidge carried the state by a large majority. During his tenure as Governor, he was twice chairman of the national governors' conference, declining a third time.

Deschler, Lewis, Miami '26, held the position of Parliamentarian of the House longer than any other man in Congressional history, serving under such noted speakers as Nicholas Longworth, John Nance Garner, Henry T. Rainey, and Sam

Ravburn. Deschler was the man pictured on the right side of the President during his inaugural message and

was the man handling final electoral totals to the vice president and conferring with the Speaker on important matters. In 1971, he received the John McCormack Annual Award of Excellence for his contributions to American legislation.

Dodd, Ed, Georgia Tech '22, was a popular cartoonist for more than 50 years. He created the humorous series Back Home Again which ran from 1930 to 1945. His Mark Trail strip about an outdoor writer and conservationist began in 1946 and was carried by more than 200 newspapers and reached 23 million readers worldwide. He continued to draw the series until failing evesight caused him to relinquish the artistic

portion in 1978. The strip's record of 45 vears of uninterrupted syndication was a testimony to its appeal and a

head of the U.S. Fish & Wildlife Service said, "Ed Dodd probably reached more people with the conservation and outdoor-ethic message than anyone I know."

Dodge, Horace C., Colorado '01, was appointed by the government to oversee the relief effort for veterans disabled during the World

War. After being transferred to Washington, DC, as Medical Supervisor for the Veterans Bureau, Colonel

Dodge inspected nearly all of the hospitals operated by the Veterans' Bureau in the United States and in 1929, took charge of the Oteen Veterans Administration Hospital in North Carolina, which routinely housed an average of 800 patients dving from tuberculosis.

Edwards, Miles Lowell, Oregon State '24, at the age of 60, gained international acclaim for his role in developing the first efficient and most widely used heart valve in the world. The grandson of an early Oregon settler, his experimenting as a child began a lifelong inventing career that would bring him at least

Most Influential Delts 20th Century

60 patents. As a vouth, he built his own bicycle and a wireless radio set. becoming the first person in the area to send messages by voice. Other inventions later included the automobile parking brake, a gasoline

mileage meter and turn signal and a highly successful "whirling wheel" that stripped bark from logs.

During W.W.II he invented a centrifugal fuel booster pump that eventually was used on 85% of U.S. military planes. He went on to found American Edwards Laboratories in California and spawn a medical devices industry generating well over \$300 million a vear in worldwide sales during the 1960s.

Egan, Mark W., Northwestern '27, early on in his career gained a reputation as a savvy sales manager for the nation's most successful hotels. During the 1930s, he headed Convention and Visitors Bureaus around the country, entering the Army in 1942. He found his way eventually to Hawaii to work as Chief of Service for the Pacific Division of the Air Transport Command. The "convention man" directed the "world's biggest hotel chain under fire in the Pacific." From

his Hickam Field headquarters, Egan sent out orders for handling of messing, billeting and post exchanges of all

ATC bases scattered over 42,000 miles of air routes extending from the west coast of the United States to New Zealand, Australia, Manila and Okinawa. While still in uniform the day of his discharge, he was signed up by the Hawaii Tourist Bureau to oversee postwar reconversion and jump-start the islands' tourism program which had been in limbo since W.W. II began.

Ehrmann, Max, DePauw 1894 was an author and poet whose bestknown work. Desiderata, became a million-selling Grammy award winner 17 vears after his death. Written in 1906 but not published until 1927, Desiderata was recorded by Les Crane, it reached the Top Ten in 12 countries and was the Best Spoken Word recording in 1971. Known as a "student of the human heart" some of his other best known works are Jesus: A Passion Play, and The Wife of Marobius and Poems. When it celebrated its centennial, he was chosen to write the DePauw University Centennial Ode. His most famous work, A Praver, was translated into 32 languages and dialects and was more widely circulated than any other praver written in the English lan-

Lord's Praver. More than a million copies were printed by 1950. It was set to music and inserted into the Congressional

Record. It was stolen from public buildings, pirated, modified and plagiarized, found on the bodies of suicides, the last solace of condemned criminals, the daily lesson of millions of school children, the cherished possession alike of the Fifth Avenue millionaires and the Bowery poor.

Evans, Edgar H., Wabash 1892, became one of the most prominent Delts in Indiana at the turn of the last century, not merely by reason of his success in business, but by virtue of his great influence upon the educational, religious and cultural activities of his city and state. After leaving college, Evans joined his father's flour milling business, making it the largest in the Midwest and, through consolidation, the Acme-Evans Grain Company, of which he remained president for 25 years. He devoted a great deal of time to study of the place of religion in the curriculum of the average small or

middle-sized college of the country. A number of brochures upon the results of their investigations received favorable comment both from religious and educational sources regarding his objective in making people familiar with the Bible and its literature as part of modern scholarship. Evans' success in business was signalized by such

Commission

honors as president of the Millers National Federation. chairman of the Indiana Wheat Improvement

Fishbach, Howard, Ohio State '09, the son of a distinguished physician, joined his father's practice after graduation from medical school. Prominent as an abdominal surgeon and gynecologist, Dr. Fishbach was largely responsible for the founding of a medical center in the most remote part of the Kentucky hills. Regularly he and other physicians would spend a "holiday" at the clinic, to make free medical service available to the poor families of that region. Prominent as an abdominal surgeon and gynecologist, Dr. Fishbach affiliated with the Cincinnati Academy of Medicine and was a member of Bethesda Hospital's surgical staff. To Delts however, he is most remembered as the benefactor of the Fishbach Residency Foundation scholarship which enables young Delt physicians and surgeons to accept highly valued residency appointments.

Fitzwater, Marlin, Kansas State '64, was the only person to serve as press secretary for two presidents-Reagan and

Bush-between 1982 and 1992. Widely associated in the public mind with presidents and politics, Fitzwater

was actually a civil servant for more than 20 years before he took his first political job, a post in the Reagan administration.

Frank, I. Glenn, Northwestern '12, served as president of the University of Wisconsin for 15 years and was widely recognized as one of the country's foremost thinkers and a leading progressive. He was a member of a group headed by Ex-President William H. Taft that drafted a covenant for the League of Nations. After serving four years as editor of The Century magazine, he was appointed president of the University of Wisconsin at the relatively young age of 38.

From 1925 until he died in 1940, he wrote a daily editorial which was widely syndicated in American newspapers. During this period he also wrote several books, one of the most popular

of which was America's Hour of Decision (1934) which rapped the Roosevelt regime smartly on the knuckles. His thesis that no government could succeed which secured votes through promising the moon was widely received and, at one time, he was considered a likely prospect for the Republican presidential nomination. His death at the age of 53 deprived America of one of its most able educators and writers.

Frazar. Everett W.,

Stevens Institute of Technology 1890, got his start in the laboratory of Thomas Edison

and pioneered the import-export business in Japan. Son of one of the original Yankee traders who entered Japan with Commodore Perry's expedition in 1854, after graduation Frazar began his career with the Edison Phonograph Works in 1890. He transferred to Edison's laboratories and then was off to Europe to demonstrate Edison's new inven-

tion, an electrically propelled and operated torpedo. In 1896 he joined his father's firm, Frazar & Company, in Japan, where he continued demonstrating inventions of Thomas Edison, later expanding his activities to represent such American manufacturers as Henry Ford, the Baldwin Locomotive Works and the Victor Talking Machine Company. The early automobile and the Baldwin locomotive were among the various products that Supersalesman Frazer imported to the Orient. Introducing the Edison phonograph, he saw his innovation gain such favor that in 1933 Japan became the greatest purchaser of phonographs and records in the world. One of his most remarkable performances was the unique experience of demonstrating, in the early 1900s, the Wilbur Wright Flying Machine to the Emperor of Japan.

Fuller, Stephen H., Ohio '41, set and reached a progression of goals earning him worldwide reputations in education, business, industry, and publishing. Each objective led him to new intellectual adventure, usually with international implications and always with creative content. Under Fuller's guidance as chairman, World Book encyclopedia restructured to better meet the demands of global competition -promoting growth, establishing closer customer relations, operating more effectively-all keystones of Dr. Fuller's career-long professional philosophy. After graduating from Ohio, he attended Harvard Law School before a stint in W.W. II. After the war ended, he returned to Harvard, rising to the rank of full professor and associate dean for external affairs. To support U.S. government policies toward developing countries in the late 1960s, Dr. Fuller formulated and established Southeast Asia's first full-time graduate level school of management, personally raising \$11 million in start-up funds. He later joined General Motors as vice president, directing the company's worldwide areas of salaried personnel administration and employee development, improving effectiveness and reducing costs by \$1.25 billion in a single year. He returned to Harvard until 1982, teaching business strategy and human resource management before accepting the position with World Book. Always in demand as a consultant, Dr. Fuller advised more than 100 national and international companies on strategic planning and management and received the Philippines' highest honor, the Presidential Medal of Merit,

Galbreath, John W., Obio '20, throughout his career established himself as a leader in real estate development, horse breeding and professional

baseball, in addition to his notable charitable and philanthropic activities to a number of causes. Head of

the John W. Galbreath Company in Columbus, Ohio, he served as president of the National Association of Real Estate Boards and was the owner of the Pittsburgh Pirates when they won the World Series. Prominent as a sportsman, Galbreath was captain of the River Ridge polo team and for years bred thoroughbred racing stock at his Darby Dan horse farm, including among his clients, Queen Elizabeth II, who visited his Kentucky stables whenever she was in the States.

Glasgow, Arthur G, Stevens Institute of Technology 1885, was an engineer of outstanding international experience who recorded significant service both to the advance-

ment of science and to his counpapers, he was

a Gold Medalist of Philadelphia's

Franklin Institute and the American Gas Association. In 1892 he established the firm of Humphreys and Glasgow in London to introduce Europe and the East to methods of gas manufacture then unknown in these countries. By the 1950s the corporation extended to New Zealand, Australia and India. In other fronts, in 1917-1918, he was vice chairman of the Red Cross Mission to Rumania and later served as the Fixed Nitrogen Administrator under the Secretary of War, establishing the U.S. Fixed Nitrogen Laboratory now administered by the Department of Agriculture. His portrait still hangs today in the gallery of the Virginia Historical Society in Richmond.

Goettge, Frank B., Ohio '20, is in the opinion of many, the greatest football player who ever lived who never played a game of college or professional football. From 1921 to 1925 during the sports boom which followed W.W. I, he was the most respected figure in the pigskin arena, and his exploits in the field of play are still recounted by oldtimers who followed the game in those days. Goettge, a Marine colonel who

died in action on Quadalcanal, was the star of the Ouantico Marines during the early twen-

ties and on the strength of his spectacular performances became known as "The Great Goettge." In 1922 he was praised by Walter Camp, dean of American football, as "easily the greatest football player of the present day. He is indeed the nearest approach to Jim Thorpe of all time." In the years from 1921 to 1924 Goettge and his teammates played 42 games, of which they won 38 and tied two. Throughout these campaigns, Goettge's running, kicking, passing and defensive play were dominant factors. Colonel Goettge's official duty with the Marine Corps distinguished him as

a splendid soldier as well. He was posthumously awarded the Legion of Merit for exceptionally meritorious conduct as Assistant Chief of Staff for Intelligence. Colonel Goettge was killed in action on August 12, 1942. In both the Corps and on the gridiron, however his name is legend.

Groseclose, Elgin, Oklahoma '20, throughout his life became known as an accomplished econo-

mist, literary critic, novelist and national authority on monetary and financial problems. He published Money:

The Human Conflict, a brilliant and unique interpretation of the world's monetary history from Greek times to the present. Shortly after the appearance of his book, Mr. Groseclose was called in by the Federal Communications Commission to act as Economist in Charge of the Federal Investigation of American Telephone and Telegraph Company in New York. He also served as the U.S. Assistant Trade Commissioner, analyst for the Guarantee Trust Company and economist and associate editor of Fortune.

Gunn, Frederick C., RPI 1887, set out to make a name for himself as an architect. He did just that. The six-state area around Kansas

City is dotted with Roman-arched courthouses, city halls, and railroad stations. products of his drawing board. In the 1890s, Gunn supervised construction of

the old City Hall, the new City Market and the city hospitals and nurses' homes on Hospital Hill. Of all his projects, the latter was his favorite and he exercised a combination of tastes with reminders of the spirit behind the Greeks, the Romans, Shakespeare and the

try. Holder of several patents in gas technology and author of numerous technical

Most Influential Delt. 20th Century

Victorian age. At the time of its construction, the National Fidelity Life Building was the tallest building in Kansas City whose height in the area was later surpassed by Gunn's design for the Jackson County, [MO] Courthouse. Keeping his Kansas City office, he moved to Washington and was appointed Superintendent of Public Buildings for the United States. He revised the city's building code, with new classifications as to fire resistance for each type of occupancy.

Hall, Custis L., George

Washington '12, was cited as Washington's First Citizen, having rendered outstanding service to the people of the District of Columbia. Hall was a distinguished Washington surgeon who brought relief to thousands of crippled children and adults, and who gave

freely of his time to those in need. Throughout his medical career, he never turned a patient away because of a lack of funds. For many

years Hall conducted a clinic at Children's Hospital, where his surgery made it possible for otherwise hopelessly crippled children to overcome their infirmities. In 1917 he gave up his practice to join the Army Medical Corps, and served two years overseas in France and England. A member of the staffs of every hospital throughout the District of Columbia, he was elected a Fellow of the American College of Surgeons.

Hamblen, Archelaus L. Maine '16, as Chief of the United Nations Command Repatriation Group, was responsible for the repatriation of United Nations Prisoners of war who had been captives of the Red Forces in Korea, Previously he had been G5 for Civil Affairs on the staff of the Korean Communications Zone. In this capacity, based on his long experience and expertise with the political, economic, and sociological problems incident to war, he contributed significantly to Korean economic stabilization measures and the related political considerations. After the defeat of the Axis forces in North Africa in W.W. II, he accompanied General Mark Clark into Italy, contributing materially to the reorganization of an effective Italian government and in the development of the terms of the Peace Treaty in Italy, His acknowledged excellence in the highly specialized fields of Civil Affairs and Military

general officer rank and such coveted U.S. decorations as the Distinguished Service Medal,

the Legion of Merit, and the Bronze Star. In

recognition of his W.W. II service, Britain's King George VI conferred on him The Order of the British Empire.

Hatfield, John N., Penn State '20, served as administrator of The Pennsylvania Hospital in Philadelphia, the oldest hospital in the United States, founded in 1751 by Benjamin Franklin. As administrator he oversaw the most active accident department of any hospital in Philadelphia as well as one of the largest out-patient and maternity departments in the area. In addition to overseeing the medical interns and the School of Nursing, he oversaw the historical significance of the historic structure and the preservation of the

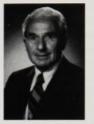

priceless records, the continuation of all policies which stamped the hospital as unique in its

field and the

advancement of the teaching program which had been underway for nearly two hundred years. He was a frequent contributor to hospital

magazines and numerous hospital associations.

Hibbs, Eugene B., Kansas '33,

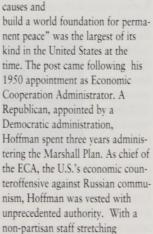

career as a salesman for Inland Container. leaving in 1945 to start a company to produce

began his

wood-cleated shipping containers. Under his direction, the company grew to become one of the country's most successful packaging companies employing 1,200 people and maintaining annual sales of more than \$70 million. He was perhaps most well known for his civic and philanthropic efforts in the Indianapolis community and continued to be actively involved in a variety of causes until his death at 80 in 1992.

Hoffman, Paul G., Chicago '12, ended his distinguished career as head of the Ford Foundation, a research, educational and philanthropic organization set up by grants of the Henry Ford family. With assets of

more than \$125 million in 1950, the foundation, whose purpose was to "remove war's basic

halfway around the world, he made frequent trips overseas to direct the spending of millions of dollars Congress placed at his disposal. The success of his business career was equally impressive. From a position as porter in the salesroom of an auto dealership, he grew up with the automotive industry to become president of the Studebaker Corporation from 1935 to 1948. His contributions in other fields were also apparent. He founded the Committee for Economic Development in 1942 and built that project into a healthy influence on our national economy. As chairman of the Automotive Safety Foundation, he helped make the public conscious of the growing need for greater safety on our highways. He was honorary chairman of United China Relief and a member of the U.S. Dept.of Commerce's Business Advisory Council.

Hompe, Robert W., Case

Western Reserve '19. though already widely known in the pharmaceutical industry, he accelerated his rise to prominence when, in 1938, he joined the Smith Kline and French Laboratories in

Philadelphia as plant manager, planning and directing the construction of a huge new manufacturing complex there and had much to do with the expansion of plant space and the construction of new plants at several locations throughout the United States, Canada and Western Europe, becoming vice president of manufacturing in 1945-a position he held until his retirement in 1962. Machine design and development was one of Hompe's interests and he designed and put into practical operation a great deal of machine equipment in the promotion of efficient pharmaceutical and chemical manufacture so important to the rapidly expanding industry. He held a number of patents, both singly and jointly, which contributed to efficient production in this impor-

tant field.

Hooper, C.E., *Amherst* '21, a name that became a common noun signifying the audience appeal of a radio program, did not enter the field of program ratings of his own free will but at the behest of the

the behest of the country's largest magazine publishers. In 1934, Hooper set up his own market research shop, specializing in magazine readership studies. The magazine's publishers were

extremely concerned over the emigration of many of their best advertisers to network radio. The publishers felt that radio's claims of 20 million listeners were inflated and sought a more realistic picture and turned to Hooper who responded that he would do the survey but do it his own way. The Hooper way was the coincidental method of asking people what they are listening to while they are listening. It got from a listener a report of his own behavior at the time, not a delayed report of the radio habits of the whole family. The magazines contracted for six monthly surveys, each to cover listening in the 16 cities of the networks basic areas. In January 1948, the first U.S. Hooperating appeared and, a month later, the Hooper organization began publishing monthly New York City Teleratings, measuring TV audiences in the nation's first video market. Plans called for a national TV report to start in October 1949, but the rapid spread of TV across the country accelerated that deadline up to May. City Hooperatings Reports marked the beginning of a service which, in 1950 covered more than 100 markets including Hawaii, preceding his newest product, Sales Impact Ratings, which measured the effectiveness of television advertising.

Hull, Isaac H., Northwestern '09, was eulogized as "a man of vision and a pioneer in recognizing the farmer as a consumer as well as a producer." He was the first to understand that consumer cooperatives must not only do buying and selling but must reach back into processing and manufacturing. Under the leadership of Hull, Indiana's cooperators in 1935 organized the first rural electrification in the country. They were the first to buy their own coal mine and later, a lumber mill. They blazed the trail in setting up scientific chick hatcheries which revolutionized the poultry business. Under his leadership, Indiana made history by joining Ohio and Michigan farm cooperatives to contract for the entire output of a chemical plant's fertilizer, which they marketed successfully,

breaking the Fertilizer Trust. After being elected to the state legislature, he sponsored the first cooperative law

passed in Indiana and helped put through a bill establishing credit unions in 1926.

Jackson, Harold P., Dartmouth '10, was a pioneer in the casualty insurance industry's drive for safer operation of automobiles, retiring as president of Bankers' Indemnity Insurance Company in Newark, NJ, part of the American Insurance Group. Much in demand as a speaker at meetings of casualty men, Jackson wrote widely for trade publications urging stricter enforcement of traffic laws as a means of cutting

down the highway toll. One of the first casualty insurance officials to recognize the importance of safety edu-

cation for motorist and pedestrians, Jackson helped form the National Committee for Traffic Safety and also served as chairman of the committee on safety organization of the President's Highway Safety Conference and the National Safety Council.

Jerome, James A., Toronto '54, as Associate Chief Justice of the Federal Court of Canada, James Jerome held one of the most important government services positions on this continent. Before accepting that appointment, he had served more than five years as speaker of the House of Commons. During nearly 10 years as a member of Parliament, he held a series of special appointments and elections: member of a Committee on Procedure, vice chairman of the Standing Committee on Privileges and Election, chairman of the Special Committee on Election Expenses and Parliamentary secretary to the president of the Privy Council. He was elected speaker of the House of Commons in 1974

Johnston, Oliver M., Jr.,

Stanford '34, after studying art at Stanford and the Chouinard Art School, became an animator with Walt Disney. In the years that followed, he worked on nearly every Disney fea-

ture, becoming directing animator in 1939, a position he held until retiring in 1978. He received

numerous awards as one of Disney's original team known as the "Nine Old Men," and, through the course of his 40 year career, was responsible for such family classics as Snow White and the Seven Dwarfs, The Fox and the Hound, The Tortoise and the Hare, Pinocchio, Bambi, Peter Pan and Fantasia. Under Johnston's direction, the latter took more than 1,200 animators working six months to complete Disney's vision of a project that was decades ahead of its time-a feature-length film that coupled classical music with animation. It was as groundbreaking in the 1940s as MTV was

in the '80s. Ollie Johnston was designated a "Disney Legend" in 1988 by Michael Eisner and Roy Disney and his accomplishments finally chronicled in Disney Animation: The Illusion of Life, Too Funny for Words: Disney's Greatest Sight Gags and Walt Disney's Bambi -The Story and the Film. The lives of Johnson and his animation partner and friend of 64 years, Frank Thomas, were finally captured in the movie Frank and Ollie.

Kizer, Kenneth W., *Stanford* '72, in 1994 was named Undersecretary for Health in the Department of Veterans Affairs, responsible for managing the Veterans Health Administration, the nation's largest integrated health

with a nationwide staff over 200,000 and more than 171 medical centers, 360 outpatient

care system

centers, 130 nursing home care units and 37 domicilaries. Faced with an aging veteran population and an archaic organizational structure, Kizer brought sweeping reforms to the organization, enabling it to deliver better care to the nearly 3 million veterans worldwide. A former Navy diver and diving medical officer, he is nationally recognized for his expertise in environmental health and aquatic sports medicine. Former head of the state of California's health system, he served in numerous capacities at academic medical schools and chaired the board of The California Wellness Foundation, one of the nation's largest philanthropies.

Koch, Raymond J., *IIT '13*, is credited with the development and production of the early calculator. After completing his college work, he served three years in the Bridge Department of the Chicago, Milwaukee & St. Paul Railway, as a designer of concrete structures then

14 Vol.124 No.1

two years with the General Fireproofing Company. In 1930 he

became Treasurer and Director of Felt & Tarrant Manufacturing Company, assuming its presidency in 1934. There he oversaw the Comptometer, the

country's first calculating machine.

Koll, Donald, Stanford '55, grew the general construction firm he founded in 1963 into what is today one of the nation's leading real estate development companies, producing quality projects totalling more than 60 million square feet of office, industrial and retail space throughout the United States, Mexico and the Pacific Rim. Koll accomplished the success of the Koll organization through several key business practices: bringing together a management team comprising recognized leaders in the real estate and building industries, ensuring an innovative and solid financial structure and espousing a company philosophy emphasizing quality products, astute management and entrepreneurial flair. In addition to his leadership role at Koll Development, he serves as chairman for each of its affiliates including The Koll

Company, Koll Construction, Koll Resorts International and KollStart Gold Company. He is also a partner in

Koll Center Travel and Koll Bren Realty Advisors, a real estate investment advisory firm managing \$2.5 billion in assets. A past presidential appointee to the board of trustees of the Red Cross, the Air & Space Museum and the John F. Kennedy Center for the Performing Arts in Washington, DC; he devotes much of his free time to the Boy Scouts of America.

Krehbiel, V. John, Kansas '29,

became known as one of the nation's outstanding insurance advisers and counselors for individuals, business organizations and corporations, during his career with Aetna Life Insurance. With Aetna, Krehbiel qualified as a member of every top leaders club. Active in the Republican Party for many years, Ambassador Krehbiel was a delegate to the 1952, 1956, and 1960 National Conventions. He held several offices, including vice chairman and chairman of the Republican State Central Committee and was a member of the National Finance Committee. In 1959, Krehbiel

member of the Trade Mission to Germany. In 1972, he was a member of the Trade Mission to

served as a

Norway, Sweden, Finland and Denmark and, in 1973, was sworn in as the U.S. Ambassador to Finland.

Lane, L. William Jr., Stanford '42, from 1985-1989 served as US Ambassador to Australia and the Republic of Nauru, capping a long record of service to our country. He served in high positions through appointments by Presidents Reagan, Carter, Ford, Nixon, and Johnson, including ambassador-at-large and commissioner general of the world's first international ocean exposition held in Japan in 1975. He served on the U.S. Department of the Interior Advisory Board on National Parks, Historic Sites, Buildings and Monuments as chairman of the President's

National Parks Centennial Commission. He was equally well known internationally as

co-chairman of Lane Publishing

Company, the California-based publisher of books, films and Sunset Magazine. Becoming the first major medium of the communications industry to refuse DDT advertising, Sunset gained national acclaim as a magazine dedicated to the preservation of our environment through far-sighted planning.

Lathem, Louie P. Jr., Georgia Tech '42, used the passing of time as the basis for a successful career. His father and grandfather had formed a business selling clocks to businesses and manufacturers. After the end of W W II he and his father began buying used time clocks from the government which would be rebuilt and sold primarily by mail. Later they commissioned the design of a time clock and, in 1974, the first Lathem Time Recorder went on the market. The company went on to provide payroll recorders, time and energy master control clock sys-

tems and other related projects using state of the art electronics, distributed through independent office

machine dealers throughout the world.

Leavey, Edmond H., RPI '22,

became president of International Telephone & Telegraph after an outstanding 32 year career including important assignments during W.W. II. He served as assistant commissioner and chief engineer of the Works Progress Administration and, from 1940 until Pearl Harbor, he headed the War Department construction division's engineering branch which planned the expedited expansion of army bases and camps. When General Dwight Eisenhower was named Supreme Commander of the Allied Powers in Europe, General Leavey was recalled to active duty and put in charge of the planning and coordination of the supply, transportation, construction

and other logistics matters involved in defense of Western Europe by the NATO forces under General Eisenhower's command. General

Leavey received many military honors, including the Distinguished Service Medal and the Legion of

Merit with two Oak Leaf Clusters and a Gold Star. In light of his service he was named an officer of the French Legion of Honor and decorated with the Croix de Guerre with Palm.

Lightbody, James D., DePauw '06, won three events in the Olympic Games at St. Louis in 1904, and ran on the team relay making him the highest point-winner, with an Olympic record not equaled until 1936. Later at Athens, Greece, he won more Olympic honors. Following the Olympic Games, Lightbody drifted about Europe and after winning several invitation races, located in Berlin, Germany where he entered the University of Berlin doing newspaper work as a side line. He became not only the German champion, but also the European champion.

So grateful were the Germans for the athletic pioneering that Lightbody had instilled that the famous Berlin Sports Club awarded him the Golden Eagle, which never before

had been pinned upon a foreigner. The climax of Lightbody's athletic activities in Germany came when royalty asked Jimmy to tutor them. Because of his experience he was asked to head the Inter-Allied Games during 1919 in Paris, a substitute for the Olympic Games in the wake of the World War.

MacKinnon, George E.,

Minnesota '27, was the senior judge

Nost Influential e 20th Century

on the U.S. Court of Appeals for the District of Columbia. Admitted to the bar on the day of the 1929 stock market crash, his first job was

in the legal department of the Investors Syndicate, now known as IDS. In 1946 he was elected to the House of

Representatives and helped author the landmark Taft-Hartley labor legislation. He also worked behind the scenes in the investigation of former state department official Alger Hiss, helping to establish evidence in the famous "Pumpkin Papers" case that eventually led to Hiss's conviction on perjury charges. As U.S. Attorney for Minnesota, Judge MacKinnon led high profile prosecutions, including cases against organized crime and the Teamsters Union. After working on the Hoffa investigation at the Justice Dept., he returned to Minneapolis where he was president and general counsel of Investors Mutual Funds until 1969 when he was named to the appellate court.

Mattingly, Thomas Ken,

II. Auburn '58, at the time of his selection as a member of the fifth group of astronauts, he was a student at the USAF Aerospace Research Pilot School at Edwards AFB. He served as a member of the support crews for Apollo 8

and 11 and played an important role in the development of the Apollo spacesuit and backpack. Although he was never officially named as a member of the Apollo 11 back-up crew, when the original back-up Command Module Pilot, Bill Anders, accepted a job at the White House, Mattingly began to train and participated as backup Command Module Pilot in most of the integrated simulations run in the final months before the Apollo 11 launch. As much of the world saw in Ron Howard's blockbuster film.

Apollo 13, he was selected as Command Module Pilot but was removed from the crew three days prior to launch because of exposure to German measles. When problems aboard the Apollo 13 craft attributed to human error and technical anomalies put the crew's return in jeopardy, Mattingly, familiar with the module, was instrumental in developing a strategy for their safe return, subsequently serving as CMP on Apollo 16. He served the Navy with distinction as a pilot with 4700 hours of flight even before being selected as an astronaut by NASA in 1966. From 1973 to 1978, Mattingly served as the head of the astronaut support team for the Shuttle program and served as backup Commander for the second and third missions. In 1982, Mattingly made his first Shuttle flight as Commander of the fourth mission and then, in January 1985, commanded the 15th mission. After leaving NASA, he served as Director, Space Sensor Systems, U.S. Navy Space and Naval Warfare Systems Command. Now he is Director, Utilization and Operation, Grumman Space Station Program Support Division, Reston, VA. For the record, he logged an additional 265 hours in space and received NASA's Distinguished Service Medal.

Maynard, Leonard, A.,

Wesleyan '11, received national acclaim as the director of Cornell University's School of Nutrition. An internationally known nutrition

Maynard knew that there were more vitamins to be discovered, more ways to use and market

authority, Dr.

milk and other farm products, added food elements, and new 'truths' to be established as to why the human body may or may not use these elements under certain conditions. In their investigation of man and his diet, Maynard's program drew on the resources of some 500 scientists throughout the Cornell colleges.

McCarthy, Tim, Illinois '71, through a small but selfless act, changed the course of modern history. Enjoying his 15 minutes of fame for throwing himself between President Reagan and assassin John Hinckley, thereby saving the President's life, McCarthy was severely wounded in the stomach. McCarthy began his career with the U.S. Secret Service in 1972 and, in 1978, was transferred to Washington and assigned to the White House detail providing protection for the President. By unanimous resolution of the Senate, McCarthy was commended for his "...unselfish and skillful efforts in helping save the life of President Reagan." Without McCarthy's act, Reagan would probably have been killed, thus avoiding the end of the Cold War, the fall of communism and the tearing down of the Berlin Wall. McCarthy's act of heroism was truly one of far-reaching significance.

McCray, Arthur W., Penn State '39, established a reputation for

himself while still an undergraduate student of petroleum and natural gas, with his development of the orifice meter chart. With the final blueprinting of the chart and correspondence with the US Bureau of Copyrights, McCray was able to secure a copyright for the chart in 1937. The chart was used to take care of the computations connected with the use of orifice meter, a meter used to measure the rate of flow of a fluid or gas through a pipe line. Its basic principle is that a certain pressure is required to force a given amount of fluid or gas through a small hole, or orifice, which is

placed in the line. McCray's chart eliminated lengthy calculations for each specific

case and makes the answer directly available by the simple expedient of laving a straight edge across the chart. In addition, the chart contained scales used to correct the readings for the different specific gravities of gas. This chart had great use around oil fields where frequent measurements were taken from orifice meters.

McDougall, Ron, Wisconsin '64, at the helm of Brinker International,

helped to rewrite the rules for the restaurant industry, pioneering the casual-dining concept that has been the hottest idea in the restaurant industry in recent years. With Norman Brinker, they created Bennigan's, Steak & Ale, and expanded the

Chili's chain to include Macaroni Grill, Regas Grill, Cozvmel's, Corner Bakery, On the Boarder, Spageddies and Grady's American Grill. The chain's Maggiano's line has undergone rapid expansion and the design for each restaurant was tweaked to reflect the architecture of the locale. The chain reached its 1999 goal of \$2 billion in annual sales and nearly 100,000 employees.

Benjamin, George Washington

McKelway,

'19, ended his career as head of the nation's top news organization,

the Associated Press. He started as a reporter, working his way up to the top via assignment as city editor, news editor, managing editor, associate editor and finally editor in chief. He served briefly with the Washington Times, then the New Britain Herald, landing with the Washington Star in 1921 where he remained through his career.

Michalis, Clarence G., Stevens '07, was a New York banker who was instrumental in spearheading relief to Holland after its disastrous

floods in 1952. Within 24 hours after hearing the news, Michalis had organized Holland Flood Relief with such sponsors as Herman Baruch, former Ambassador to the Netherlands, Francis Cardinal Spellman, John J. McCloy, Dr. Grayson Kirk and Bishop Horace Donegan. Michalis, who was president of the Seamen's Bank for Savings, turned over its facilities to Holland Flood Relief. Within two weeks, \$500,000 had been collected and money continued to pour in. The \$300 million damage done by the flood set back Holland's postwar recovery by an estimated three years. With 1,000 farms inundated in the tiny country, relief needs required tremendous funds. Besides his banking interests, Michalis was also director or

trustee of several insurance companies and business firms and was widely known for his outstanding public service and the diversity of his wel-

fare work including serving as director of the Federation of Protestant Welfare Agencies.

Mitchell, Stephens, Georgia '15 approved the first draft and then spent much of his life protecting the copyright of Gone With the Wind, the book authored by his sister, Margaret, in 1936. An accom-

plished real estate lawyer with a successful Atlanta practice, his influence was frequently cited in his sister's biogra-

phy The Road to Tara. He died in 1983 at the age of 87.

Mudd, Roger, Washington & Lee '50, a longtime television anchorman and correspondent who joined CBS in 1961. Specializing in coverage of Congress and political conventions, he also anchored the

Saturday edition of CBS Evening News (1966-73) and Sunday edition (1970-71). He joined NBC-TV in 1981 and spent seven years as chief Washington correspondent, anchor

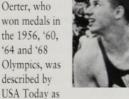

Almanac. cohost of Meet the Press and co-anchor of NBC Nightly News. He became part of

of American

the MacNeil-Lehrer News Hour in 1987 and accepted a position as a Ferris Professor of Journalism at Princeton in 1992.

Oerter, Al, Kansas '58, was most recently visible as the final torchbearer carrying the Olympic flame into the stadium during the '96

Olympics in Atlanta. Oerter, who won medals in the 1956, '60, '64 and '68 Olympics, was described by

the "ultimate Olympic competitor."

Otto, Henry, S., Cornell '07, gained national recognition when, in 1945, he was assigned to U.S. Chief of Counsel at Nurnberg, assisting in the prosecution and interrogation as well as in the assembly, classification and briefing of data pertaining to the German defendants of Nazi war crimes. Prior to W. W. I, Colonel Otto gained experience in foreign lands through his engineering work with American firms in Europe and South America. In 1917, he went overseas with the "First Hundred Thousand" as a first lieutenant of field artillery.

Section of

General Pershing's staff. After the Armistice in 1918, he served a Mission to Poland, During the peaceful period between the two great wars, he served as treasurer of a New York-based import-export business until he was summoned back to active duty during W.W. II.

Parks, William H., Vanderbilt '15, a prominent architect throughout his life, joined the New York firm of Roger Bacon who had just heen commis-

sioned to design Washington, DC's Lincoln Memorial. The young architect assumed the

task of designing the columns for the monument though, because of W.W. I. it would not be completed until 1922. Will boasted that more people saw his work than that of any other architect since the memorial was featured on both the penny and five-dollar bill. As an avocation, in 1937 he moved his greatgrandfather's long house to Tennessee and transformed it into a museum of the unusual and macabre including the skeleton of Jesse James and a bear grease lamp that once belonged to Davy Crockett. Living to past 100, he was one of the few Delts who attended all 12 World's Fairs since their creation in 1892.

Thomas L. Ohio State '43, headed Big Drum, Inc., a Columbusbased company that pro-

Parker.

duced and shipped frozen chocolate ice cream cones by the millions throughout the world. It also became the largest producer of rolled sugar cones and also a leader in the production of packaging supplies and premier manufacturer of

equipment used in ice cream plants. Big Drum grew to include plants in seven U.S. cities and five European nations. Under Parker's leadership, Big Drum's ice cream novelty packaging concepts and processes and sophisticated machines made Big Drum a familiar name on an international scale.

Poole, H.M. Washington '41, joined Johnson & Johnson in 1941 and through rapid succession, rose to regional manager, vice president member of the management board and vice chairman of Johnson & Johnson, becoming vice chairman in

1971. After his retirement, he became a trustee of Scripps Memorial Hospital and, in 1976 he was elected chairman of the Board of Directors of The Arthritis Foundation.

Posey, Darrell, Louisiana State '69, moves equally between the movers and shakers of the entertainment and political arenas. His life

has been spent in the protection of biological and cultural diversity and, as he sought to find solutions to the problems

which faced Planet Farth, believed that the answers lay within the collective wisdom of its people. He organized the 1992 Global Coalition for Bio-Cultural Diversity. held in conjunction with the Earth Summit, and served as chairman of the first ever Earth Parliament. bringing together representatives of 1142 nations to document the experiences that indigenous peoples had in managing, conserving and using the environment in socially and environmentally responsible ways. He worked to save the Brazilian Amazon, and, in addition to nearly 200 articles and publications on the environment, participated in the

He advanced rapidly to the rank of major as a member of the Intelligence

Vol.124 No.1 17

direction and production of 14 films for television including the awardwinning "Jungle Pharmacy." In 1989 the Sierra Club honored him for outstanding courage in the defense of the environment.

Post, Wilfred M., Jr, MIT '36,

more commonly known as "Wiley"

was a life-long flying enthusiast who is credited with being instrumental in developing the airport from a sod landing field to a modern complex. In addition, he played major roles

in organizing the country's first pilot training program for college students and with contributing in many other ways to aviation.

Quaal, Ward, *Michigan* '41, was a broadcasting executive with Chicago's WGN for many years. He won numerous awards including election to the Broadcasting magazine Hall of

Fame in 1991 and the Distinguished Service Award from the National Association of Broadcasters.

After a long stint as president of WGN Continental Broadcasting, he became president of the Ward L. Quaal Company, a Chicago-based communications industry consulting firm.

Richardson, William, Tufts '70, currently Secretary of Energy in the Clinton Administration, established a reputation as a no-nonsense problem solver and an effective advocate for his constituents. Before being elected to

Congress, he worked as an international business consultant in Santa Fe. As a Congressman from New Mexico, he served as a staff assistant for the Senate Foreign Relations Committee and the State Department in Washington. Throughout his tenure in the House he pursued numerous bills and amendments in the areas of energy, the environment, Indian issues, health, foreign policy and defense. He was a leader in Clean Air legislation, laws to protect coastal areas from oil spills and the expansion of national parks and designation of wild and scenic rivers.

Rickey, Branch, Ohio Wesleyan '04, was the finest mind ever brought to baseball and modern

baseball reflects many of his innovations including developing the farm system, whereby major league teams own control-

ling interests in minor league clubs to obtain promising young players. He was unmatched in his ability to develop young players, he built championship clubs and he singlehandedly made the most enduring contribution to the game by breaking the ban that had barred qualified Black players from the sport with Jackie Robinson. In 1919 Rickey became manager of the St. Louis Cardinals, leading the team to six National League pennants. He also served as general manager of the Brooklyn Dodgers and Pittsburgh Pirates, leading his teams to many league and World Series championships. His life encompassed a variety of vocations and avocations: schoolteacher, coach, athletic director, soldier, lawyer, all in addition to his service to baseball. He was posthumously elected to the Baseball Hall of Fame in 1967.

Rote, Kyle, Jr., *University of the South* '73. Following his success as a pro soccer player, he has been a sports analyst and commentator for several networks including CBS, NBC, PBS and the Hughes Sports

Network. He spent eight years with USA Network as a Game of the Week announcer in football. soccer

and track. He hosted the ESPN weekly show *Just for Kicks* and worked the 1990 World Cup and World Games.

Rowland, F. Sherwood, Ohio

Weslevan '48, became the first Delt to win the Nobel Prize for Chemistry in 1995. In 1974, Rowland published an article on the threat to the ozone laver from CFC gases in aerosol cans, as the cooling medium in refrigerators and elsewhere and plastic foams. Rowland realized that the chemically inert CFC could gradually be transported to the ozone layer, there to be met by such intensive ultraviolet light that they would be separated into their constituents, notably chlorine atoms. His report led to restrictions on CFC release during the late 1970s and 1980s. In 1985, the real

shock came-the discovery of an ozone hole over the Antarctic. By explaining the chemical mechanisms that affect the thick-

ness of the ozone layer, Rowland's research contributed to our salvation from a global environmental problem that could have had catastrophic consequences.

Sears, Paul B., Ohio Wesleyan '13, earned distinction not only for a scientist's skills but principally for the writer's literary qualities. Practically all of Professor Sears' time has been given to his beloved field of ecology. Even the war period, during which he served in the aviation service, proved of value. In Florida he utilized his flights to observe landscape and vegetation scientifically from the air. A paper in Science was one of the first published on the use of the airplane as an aid to the ecologist. One of Professor Sears' earliest studies was of the native vegetation of Ohio, mapping it as it was before the entrance of the "white man." Becoming one of the world's experts in postglacial climate, Professor Sears was able to predict from his

study of vegetation two distinct lines of preglacial valleys in regions naturally treeless. Professor Sears was also able to accu-

rately chart the story of the soil since man's coming to this continent, told in his book *Deserts on the March*.

Scott, Elmer, Ohio Wesleyan 1889, after a lifetime business and civic career, was known at his death as The First Citizen of Dallas. After a long business experience with Sears Roebuck & Company from 1895 through 1913, Scott resigned to devote his time to the development of Dallas. He became the first director of the department of public welfare and, in 1917, created the Civic Federation of Dallas, a unique institution which devoted its energies to the development of civic and social consciousness through the channels of adult education. During

its twenty years of existence under Scott's leadership, the Civic Federation prepared social studies on varied topics such as wages and hours, newsboys in Dallas, African-American

housing and marriage and divorce. He personally codified and annotated in two handy volumes the laws of Texas relating to social problems and gathered a library of the best books from various fields. Scott was instrumental in developing the Dallas Open Forum which presented the foremost speakers of the day

to Dallas audiences with no charge. The *Encyclopedia Britannica* described Scott's achievements with the Civic Federation as an outstanding example of a privately supported institution in the field of adult education.

Scrimshaw, Nevin, Ohio Wesleyan '38, was named the 1991 winner of the World Food Prize which honored individuals who had made significant and measurable contributions to improving the world's food supply. Honored for his lifelong dedication to alleviating hunger and malnutrition in developing nations, Dr. Scrimshaw's revolutionary accomplishments over five decades made a substantial

improvement in the lives of millions of people-in dozens of countries around the globe. Using a mixture of cottonseed flour and maize, Dr. Scrimshaw was

responsible for the development of Incaparina, which could be purchased at one-fifth the cost of milk. Today, Incaparina is given to 80 percent of Guatemalan children in their first year of age to combat protein deficiency. During the 1967 famine in India, Dr. Scrimshaw guided the development of a similar food, Balahar, adapted to peanut flour and wheat. Scrimshaw's principle is still the basis for locally produced, low-cost foods as a preventative for malnutrition in developing countries. In 1975, he initiated and directed the World Hunger Program during the early development of the United Nations University in Tokyo. The author or editor of 19 books and more than 600 articles on various aspects of nutrition.

Seeber, Lynn, Tennessee '47, served as the top administrator of the Tennessee Valley Authority, met the challenges of providing more electricity through the Valley and keeping down the price of power while at the same time improving

the environment. Seeber joined TVA's legal staff in 1952 and was still a bright young lawyer when they

plucked him to head the important Division of Reservoir Properties in 1967. He didn't stay long in that job for TVA General Counsel Charles McCarthy retired.

Shores, Richard, Indiana '39, was a composer-conductor who was involved in creating the musical scores of numerous TV series, specials and movies of the week. He helped create the music for *Gunsmoke, Perry Mason, The Twilight Zone, Wagon Train, Alfred Hitchcock Presents, Mannix, Police Woman, Hawaii Five-O, Ouincy* and *Police Story.*

Springer, John M.,

Northwestern 1899, culminated a life of religious service at age 62 with his unanimous election by the General Conference to Missionary Bishop to the Methodist Episcopal Church over the vast continent of Africa.

Sometime during his undergraduate years, the resolution to be a missionary laid hold of John Springer. No

sooner was his undergraduate career completed than he was on his way to his chosen field, that of Africa. As a man past sixty with thirty-five years of hard missionary service behind him, he remained strong and vigorous. His pioneering spirit never faltered because of danger or hardship. He opened up more than one new field. Wherever he went, schools, hospitals, churches were built to meet the needs of the people whom he was serving. He laid good foundations and built with an eye to the future.

Stair, Alva T., Oklahoma '52, as an Air Force officer, designed, developed and fielded unique spectral instrumentation and interpreted optical data. Since that time, Stair led the way in a series of scientific developments that earned his appointment as the chief scientist of the Air Force Geophysics Laboratory, one of the world's top research organizations. Among his accomplishments were guiding conversion of a KC-135 aircraft to a "flying laboratory" that measured infrared emissions from nuclear detonations, auro-

ra, missile launches and in-flight aircraft. He oversaw development of a new sensor that flew aboard

the Space Shuttle. During his career, Stair was recognized for many breakthroughs in infrared technology. He created a capability of studying the excitation of molecules by high energy impact with other neutral species-molecular beams, considered fundamental in understanding reactions of high temperature gases. In the '70s, he directed a major infrared rocket probe research program studying the aurorally disturbed atmosphere, publishing more than 60 research papers throughout his career.

Starr, Floyd, Albion '10, was known to judges, governors, senators, policemen, including hundreds of boys, as Uncle Floyd. Starr hasn't a dime. He gave away all of his possessions years ago. With a savings

and a family inheritance he purchased a 640-acre farm near Albion, MI which he transformed into the Starr

Commonwealth for Boys. He believed there was no such thing as a bad boy...that every normal boy will be good if given an opportunity in an environment of love and activity. In what was the world's most unique boy character factory from which nearly 1000 boys developed into substantial citizens.

Stuck, Hudson, University of the South 1892, combined a world-

famous mountain climbing career with the quiet but never uneventful life of a missionary among he Indians of Alaska and the

Yukon. When Stuck became the first man to climb Mount McKinley, America's highest mountain, he not only won fame but climaxed one of the strangest series of events in the history of exploration, Dr. Frederick Cook's fraudulent claim that he had reached McKinley's summit in 1903. From his subarctic mission at Fort Yukon, Stuck, Archdeacon of the Yukon, had followed with interest each successive attempt to conquer his beloved Denali, the Indian name for Mount McKinley.

Thomason, Mims, Tennessee 31, reached the pinnacle of his career in 1962 when he was named president and general manager of United Press

International, the largest press association in the world. Following graduation from college he went to work for the Knoxville Journal, where he became city editor. In 1931 he left Knoxville to take a posi-

tion as secretary to W.R. Davis, an international financier, with whom he traveled extensively in various countries. Subsequently, he was with the *Detroit Times* and was managing editor of the Suffolk, *Virginia News-Editor*. Joining UPI in 1934, his progress was steady until his appointment as president.

Tilton, James, *Iowa* '59, an award-winning scenic and lighting director for more than three

decades, he served as the primary designer at New York's APA Phoenix Theatre Company and the John Drew Theatre, in addition to working with national touring companies and other professional regional companies. His productions included You Can't Take it With You, Oh! Calcutta!, Private Lives, Butterflies are Free. The MadWoman of Chaillot, Harvey and The Criminals. He worked as a designer on numerous PBS specials including You Can't Take it With You, A Conflict of Interest and others.

Trout, Monroe, *Pennsylvania* '53, was honored in 1995 by the Horatio Alger Association of Distinguished Americans for succeeding in the face of adversity. He

worked his way through medical school and later went on to earn a law degree. In 1964, Congress enacted sweeping legislation regulating the phar-

maceutical industry in 1964 in response to the controversy over the drug Thalidomide. With both a medical and a law degree, Trout was in demand and joined Pfizer as a Washington lobbyist, later to head its entire government affairs department. Later joining Winthrop Laboratories, he became senior vice president for medical and scientific affairs, responsible for all drugrelated affairs and research worldwide. In 1986, he joined American Healthcare Systems, a major healthcare conglomerate valued at more than \$4 billion with ownership in 30 healthcare companies across the country. Recognized for his medical and legal expertise, Trout was twice a finalist for the Secretary of Health and Human Services post and served on more than 45 boards of major corporations, foundations and universities during his career.

Trumbo, Dalton, *Colorado '28*, was determined from an early age to be a novelist. His anti-war novel

Johnny Got His Gun about a man who was horribly disfigured during W.W. I, appeared in 1939 and won a National Book Award. He won his first screenplay Oscar in 1940 for Kitty Foyle and later won Oscars in 1953 for Roman Holiday and 1956 for The Brave One. Other memorable screenplays included Thirty Seconds

Over Tokyo, Spartacus, Exodus, Hawaii, The Sandpiper, Papillon and Executive Action. During

W.W. II, Trumbo was a war correspondent with the US Army Air Forces and was one of the so-called "Hollywood Ten," prominent scriptwriters and directors, who were arrested for contempt of Congress during the McCarthvist crusade against Communism in the 1950s. After his release, Trumbo was blacklisted and unable to find work in the US, moving with the other blacklistees to Mexico. He continued writing scripts under various pseudonyms. His last novel, Night of the Aurochs, was published after his death in 1976.

Uehling, Edward A., Stevens Institute of Technology 1877, is perhaps best known as the inventor of the Uehling pig iron casting machine, now in use in all large iron-making plants. This device brought about a phenomenal increase in production in the plants where it was first installed. Among his other inventions (there were

close to 30) are the pneumatic pyrometer, the pioneer autographic device for measuring temperatures in blast furnaces, and a recorder

which continuously recorded the percentage of carbon dioxide in flue gas, insuring thorough combustion in blast furnaces. Immediately after

Uehling's graduation, he became an assistant professor, specializing in the investigation of the properties of cold rolled iron. Later he held positions with railroad, furnace and iron firms. While serving in blast furnace plants from 1880 to 1895, he developed and made practical his pyrometer, an instrument which indicated and recorded temperatures up to 2,500 degrees. From 1896 to 1919, he was president of the Uehling Instrument Company, manufacturers of recording instruments. During this period he introduced his pig iron casting machine in principal European countries where it was responsible for increasing the output of European industry. Living to surpass 100, he was a contributor to many technical publications and, at the age of 80, authored Heat Loss Analysis, an engineering bible in its day.

Uliman, Myron E. "Mike, III,

Cincinnati '69, perhaps is best known as the retailing titan who rescued an American icon from the brink of bankruptcy. As chairman and chief executive officer of the venerable R. H. Macy & Co.

department store, the institution's board of directors, recognizing that their business was floundering under oppressive

debt, brought in Ullman to pull off his own Miracle on 34th Street and turn the store around. Regardless of where Ullman's diverse career took him, he left behind in his wake a track record of accomplishment and respect among his peers. Shortly after college, he was chosen as one of 14 young leaders in the country to participate in the prestigious White House Fellows program where he served for one year as executive assistant to U.S. Trade Representative William Brock, From the White House, Ullman moved to Federal Department Stores, becoming executive vice president of its

Sanger Harris division. Later he joined fraternity brother Peter Woo in Hong Kong as chief operating office of Wharf Holdings Ltd., of which Woo was chairman. In 1988 he returned with his family to the United States to begin his career at Macy's and, as they say, the rest is history.

Wagoner, G. Richard, Duke

'75, stepped into the presidency of General Motors' North American operation at a time when he needed to stem the company's billion dollar losses and focus more on strategic

planning for the future. At the tale end of the Baby Boomer generation, the young Wagoner established a reputation as a flexible and approachable executive who was

popular among his fellow executives. Most recently GM's Chief Financial Officer, he served as president of GM's Brazilian operations and was responsible for its Worldwide Purchasing Group. In his position as president, he was responsible for more than 60% of GM's worldwide sales. Under his leadership, the end of a sluggish economy accompanied by a bevy of attractive new models, bringing the company back to record levels of financial health and proving the old adage "What's good for General Motors is Good for America" to be true.

Walker, Lewis, Allegheny 1877, was born rich to a successful Ohio businessman. Defeated repeatedly, he went on with his idea of a "hookless fastener" (now known as the zipper) to bring it eventually to great industrial success; a success not reached until he was 70. After graduation he began a successful law practice, working with many of the old Standard Oil promoters of Cleveland's Rockefeller era. He helped the western Pennsylvania gas men with their franchises and the men who built the Bessemer & Lake

Erie Railroad which carried iron ore to Pittsburgh's steel furnaces. At the Chicago World's Fair in 1893, he met a man who complained about how long it took each day to lace and unlace his shoes. Walker's solution was the first model slide fastener, and together, they planned a machine to make these little grippers that would hold securely but would open with a swish. In 1911, he founded the Automatic Hook and Eve Company in Hoboken, NI and, with an old machinist, perfected a machine that did the job swiftly, economically and commercially. In 1916, an Akron rubber company made the first well-marketed application of the hookless feature to a pair of women's galoshes and named it the Zipper Boot, using Walker's patented invention. The rubber company was smart enough to copyright the name and thus has been credited for a new word in the language. WWII found the plant in a strategic position. Its stamping machines were applicable to the war industry and the resulting business brought the company financial sta-

bility. In 1923, three decades after he first introduced the concept, great success began to dawn and Meadville found a first-class boom on its hands and the

city's affluent scrambled for stock in the Hookless Fastener Company, the very same people who had rejected it decades before.

Wall, William Guy, MIT 1896, was throughout his life associated with some of the most prominent mechanical inventions and business successes of his time. As an engineer with the Smith-Cortland Company, a Naval contracting corporation in Richmond, Virginia, he converted the first submarine from steam to gas engines. In 1899, long before gasoline automobiles were practical, Wall built his own gasoline automobile and it worked. He succeeded in attracting the attention of a group

of Indianapolis capitalists who were anxious to manufacture the "horseless carriage," and became chief engineer of the National Automobile Company. As designer and chief engineer, Wall had many

successes to his credit. He designed the world's champion "stock car" four cylinder motors; designed and built America's

first six cylinder automobile in 1905; design and built one of the first "V" type motors, the National Twelve Cylinder and was the first in America to use the full floating rear axle. He designed the famous National racing cars which won eleven out of thirteen races in 1911 and it was his ideas which enabled Joe Dawson to win the Indianapolis Speedway race in 1912.

Ware, Leon V., Northwestern '30, was a writer whose works increasingly rose in popularity throughout the 1930s. In addition to two book-length novels he authored a multitude of short stories and serials and wrote for radio. the movies and practically every magazine on the stands. The summary of Ware's success in the highly competitive field of writing is somewhat of an understatement. One of his stories, "The Phantom of the Bridge," was selected for a collection of the best fiction appearing in The Saturday Evening Post. Two other book-length novels which he wrote were Crazy Dog and Shifting Winds. Among

his serials adapted for cinema were Search, called Dangerous Waters in the Move. Postman Didn't Ring

and Rose Queen, retitled Peggy by Universal Studios. Even in his hobby, he achieved success, navigating the winning sloop, Bagatelle, the Newport Harbor-Ensenada, Mexico race, the largest ocean race in the world

Watson, C.H., Pennsylvania '01, became interested in safety work at the time of his first association with the New York Telephone Company in 1910. His work gravitated toward surgical lines and the greater part of his hospital time was spent between New York area hospitals. When in 1913 the Employees' Benefit Plan of AT&T was formed. he was asked to organize the medical unit at the headquarters New York office, which grew rapidly to a sizable department, ultimately

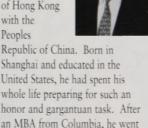

becoming Chief Medical Director for AT&T. President Roosevelt appointed him Vice President for Health of

the National Safety Council. With a long interest in Red Cross affairs and being intimately concerned in the development of first-aid measures in the Bell System and in the development of first aid equipment use throughout that organization, he was a member of various medical associations and the American College of Surgeons.

Woo, Peter K.C., Cincinnati '69.

was tapped in 1996 by the Chinese government to advise them on the integration of Hong Kong with the Peoples

Shanghai and educated in the United States, he had spent his whole life preparing for such an honor and gargantuan task. After an MBA from Columbia, he went on to to hold various positions with the Chase Manhattan Bank in New York and Hong Kong. In 1975 he

joined the World Wide Shipping Group in Hong Kong becoming vice chairman. In 1982 he was appointed managing director of The Wharf Holdings Ltd. becoming chairman of its parent Wheelock and Company, Ltd. in 1986. In 1993 he was awarded the Cross of Officer in the Order of Leopold by the King of Belgium. The Hong Kong Government appointed him Justice of the Peace. He was named Leader of the Year by the Hong Kong Standard and served as the Hong Kong Affairs Adviser to the PRC and the Prince of Wales Business Leaders Forum.

Wray, Ralph M., Colorado '20, became instrumental in ensuring that one of the nation's most enduring public monuments, the Iwo Jima Memorial in Arlington National Cemetery went from a dream to reality. Wray saw three years of active duty in W.W. II, and was stationed on Oahu, Guadalcanal, and

participated in the invasion and occupation of Pelilieu and Guam. He came out a captain and was promoted to major. In 1952, he accepted the position as Executive Secretary

of the Marine Corps War Memorial Foundation, a private, non-profit organization formed by former Marines and friends of the Corps to solicit funds to erect the first National Memorial to the Marine heroes of the war. The huge statue, sculpted by Felix de Weldon, depicted the February 1945 attempt by Marines to raise the flag on Iwo Jima. Without Wray's efforts, the largest bronze group sculpture in the world and one of the most visited sites in Washington, would not have existed.

THE DELT ALL-CENTURY PRO-FOOTBALL TEAM

s the 20th century comes to a close, *The Rainbow* would like to recognize those outstanding Delt athletes who have made great contributions to professional football. Having covered Delt footballers for nearly 35 years in the magazine, I have had the opportunity to follow the careers of many of those on the first team. In recent years, more information on early pro players has been uncovered and some additional Delt players have been found. The first all time Delt football squad selection in 1976 included college stars, in addition to pros from the National Football League and Canadian Football League. At that time, there were

fewer than a hundred Delts who had been identified as pros. Since then, additional research has yielded new names and the advent of such leagues as the Arena Football League, World Football League, United States Football League and NFL Europe enabled other Delts to play pro ball. Through the 1998 NFL/CFL season and spring 1999 NFL Europe season, the number of brothers in pro football stands at 164.

JAY LANGHAMMER

Leading the All-Century Team at quarterback is future Pro Football Hall of Famer **John Elway**, *Stanford '83*, who ended his great 16 year career with a second Super Bowl win and MVP honors. After being the first player chosen in 1983, he took the Denver Broncos to five Super Bowls and went to nine Pro Bowls. The NFL career leader with 148 victories as a starter, he ranks second in other career categories, including passing yardage (51,475), total offense (54,882), attempts (7,250), completions (4,123) and 3,000 yard seasons (12). His 300 career touchdown passes are third-best and his 3,407 rushing yards rank fourth among QBs. Other honors for John include 1987 NFL Most Valuable Player, 1993 AFC MVP and Player of the Year and 1996 MVP runner-up. He was inducted into the Broncos Ring of Honor and had his number retired in September.

Pro Football Hall of Fame runner "Tuffy" Leemans. George Washington '36, had a fine career with the New York Giants from 1936 to 1943, playing in four NFL championship contests. He led the NFL in rushing (with 803 yards) and was on the All-NFL first team as a rookie. Tuffy also was on the All-NFL first team in 1939 and the All-NFL second team in five other seasons. He finished with 3,132 career vards on 919 attempts while throwing for 2,318 yards and 25 TDs.

Our other running back, **Jules Rykovich**, Illinois '46, started his solid seven year pro career with the Buffalo Bills of the All-American Football Conference in 1947 and rushed for 300 vards or more in six seasons. After two AAFC seasons, he spent three years with the Chicago Bears (1949-51) and two with the Washington Redskins (1952-53). Over 83 pro contests, Jules rushed for 2,584 yards, caught 75 passes for 1,158 yards and scored 32 touchdowns.

Selected at tight end (even though he was split wide much of the time) is **Dante Lavelli**, *Ohio State '45*, the first Delt elected to the Pro Football Hall of Fame (in 1975), Over 11 seasons with the Cleveland Browns in the AAFC (1946-49) and NFL (1950-56), he caught 386 passes for 6,488 vards and 62 touchdowns. He was named to the All-NFL first team twice (1951,1953), the All-AAFC first team twice (1946-47) and the All-AAFC second team twice (1948-49). Dante played in five NFL title games, four AAFC title games and three Pro Bowls. At one wide receiver

spot is Boyd Dowler, Colorado '59, a member of the Green Bay Packers Hall of Fame who played in six NFL championship games, the first two Super Bowls and two Pro Bowls. With the Packers (1959-69) and Redskins (1971), he appeared in 162 regular season games and caught 474 passes for 7,270 vards and 43 TDs. Boyd was on the All-NFC first team in 1962 and 1967, gained All-NFL mention in 1963 and also had 93 career punts for a 42.9 average. He later became an assistant coach with several teams and is currently a scout. The other receiver is Gene Washington, Stanford '69,

who had a fine ten year career with the San Francisco 49ers

DANTE LAVELLI

(1969-77) and Detroit Lions (1979). Over 140 NFL contests, he caught 385 passes for 6,856 yards and 60 TDs. Gene was named to the All-NFL first team twice (1970,1972), the All-NFC first team twice (1969,1971) and four Pro Bowl squads. In recent years, he has been the NFL's Vice President of Football Operations before joining the 49ers front office.

Another longtime Packers star, Bob Skoronski, Indiana '56, gets the nod as one of our offensive tackles. Also a Packers Hall of Fame member, he spent 11 years with the club and played in 146 regular season contests, six NFL title games, the first two Super Bowls and one Pro Bowl. The other offensive tackle is Matt Herkenhoff, Minnesota '74, who appeared in 125 NFL games with the Kansas City Chiefs, from 1976 through 1985, after starting his career with the WFL Charlotte Hornets in 1974. He received All-NFL honorable mention in 1982.

Offensive guard **Howard Mudd**, *Michigan State-Hillsdale '64*, had a stellar career with the 49ers (1964-69) and Bears (1969-70) before a knee injury ended his career prematurely. A three-time Pro Bowl selection, he earned

All-NFL first team honors in 1967-68, All-NFL honorable mention in 1966 and was named to the All-NFL Team of the 1960's. Howard has been an offensive line coach with various NFL clubs for a number of years.

The other offensive guard, Tom Schuette, Indiana '67, was a leading blocker in the Canadian Football League, over 127 regular season games for the Ottawa Rough Riders, from 1967 to 1977. He also played in four Grey Cup championship games and was on the All-Eastern Football Conference first team in 1975. At center is Larry Kaminski, Purdue '66, who played in 96 pro games for the Broncos from 1966

through 1973. He played in the AFL All-Star Game following the 1967 season and received All-AFL honorable mention in 1969.

SCHUETTE Ottawa Rough Riders + Guard

NFL

in 1969. The All-Century Delt defensive unit is led by a stellar linebacking crew. Jeff Siemon, Stanford '72, played in 156

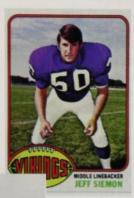

GENE WASHINGTON WIDE RECEIVE

regular season games and three Super Bowls for the Minnesota Vikings over 11 years. He was also chosen

for four Pro Bowls, was on the All-NFC second team five times (1973-77), received All-NFC honorable mention

in 1978 and had 11 career interceptions for 104 yards. **Tony Adamle**, *Ohio State '47*, played six seasons for the Browns (1947-51,1954), appearing in three NFL and three AAFC title

the 1950 All-NFL second team and went to two Pro Bowls. A two way performer in the 1930's, **Roy**

games. He was

on the 1951 All-

NFL first team,

Lumpkin, Georgia Tech '31, appeared in 93 NFL games for the Portsmouth Spartans (1930-33), Lions (1934) and Brooklyn Dodgers (1935-

"Father"

37). His hard-hitting efforts as a blocking back and defender earned him All-NFL first team honors in 1932, All-NFL second team selection in 1930 and All-NFL third team honors in 1931. Our fourth linebacker, **David Wyman**, *Stanford* '87, played in 92 games for the Seattle Seahawks (1987-92) and Denver Broncos (1993-95). He had three seasons with over 100 tackles, including a career best 133 in 1993.

Leading the three man defensive line is two way performer Edgar "Eggs" Manske, Northwestern '35, who played both ways at an end for six seasons with the Philadelphia Eagles, Chicago Bears and Pittsburgh Pirates. He earned All-NFL second team selection in 1935, played in two NFL title games and went to one Pro Bowl. Pete Lazetich, Stanford '72, saw action as defensive tackle, nose tackle and defensive end during a 66 game pro career with the San Diego Chargers, Calgary Stampeders and Eagles. Dennis Boyd, Oregon State '77, was an effective defensive end and tackle over 59 contests for the Seattle Seahawks.

Current NFL standout safety **John Lynch**, *Stanford* '93, has made one trip to the Pro Bowl during his 87

0

game career with the Tampa Bay Buccaneers. He now has 10 career interceptions, 362 career tackles and gained All-NFL honorable mention in 1998. Mal Kutner, Texas '42, had a good five year career with the Chicago Cardinals as an end and defensive back from 1946 to 1950. He had 13 career interceptions for 151 vards. earned All-NFL first team honors in 1947 on both offense and defense and repeated as an All-NFL first teamer in 1948. Mal also played in two NFL championship contests.

Tom Oberg, Oregon State '67, played in three different pro leagues during his seven vear career. After two seasons with the Broncos (1968-69), he starred for the CFL Winnipeg Blue Bombers for three seasons (1971-73) then was with Portland of the WFL in 1974-75. He made 15 career interceptions for 100 yards. Cornerback Jim Stienke, Southwest Texas State '73. started his NFL career with the Browns in 1973, became a regular for the Giants the next four seasons and finished with the Atlanta Falcons in 1978. Appearing in 66 contests, he had four interceptions for 41 yards. Getting the nod as kicker and punter is Ralph Kercheval, Kentucky '34, who performed both duties for

the Brooklyn Dodgers from 1934 to 1940. Also an offensive and defensive back, he earned All-NFL second team selection in 1935-36. In an era when the field goal was seldom tried. Ralph was the league leader (with five FGs) in 1938, booted six in 1939 and totaled 31 three pointers during his 74 game career. Official punting stats are not available for his first five NFL seasons but he did average 40.3 yards for 36 punts in 1939-40.

The obvious choice as head coach of our All-Century Team is the only Delt to have won a Super Bowl game: Don McCafferty, Ohio State '46. After a number of years as an assistant coach with the Baltimore Colts, he became the team's head man in 1970, posted an 11-2-1 record and won Super Bowl V. After two more seasons with the Colts, he moved to the Lions in 1973 but died of a heart attack after the season. During the regular season and playoffs, Don's

career pro record was 32-18-2. A num-

ber of

players

also

other top

deserve special mention for their careers. The first player drafted in 1971, Jim Plunkett, Stanford '71, was AFC Rookie of the Year for the New England Patriots. He led the Oakland Raiders to two Super Bowl wins during his 15 year career and was cited in the 1996 book Total Football as one of the 300 greatest pro players (along with Elway, Lavelli and Leemans). The MVP of Super Bowl XV, Jim completed 1,943 of 3,701 attempts for 25,882 yards and 164 touchdowns. Mark Rypien, Washington State '86, was on the All-NFL first team for the Redskins in 1991. gained All-NFL honorable mention in 1989-90 and earned MVP honors in Super Bowl XXVI. After 10 pro seasons, he has thrown for 18,416 vards and 115 TDs.

Other offensive backs include **Lou Smyth**, *Texas* '20, who played seven seasons and was All-NFL first team in 1923; **Bert Bloodgood**, *Nebraska* '25,

> who was on the 1926 All-NFL first team and the 1925 All-NFL third team; Fred Vanzo,

Northwestern '38, All-NFL first team in 1940 and All-NFL second team in 1939; **George Sauer**, Nebraska '35, a 1935 All-NFL first teamer who later was New York Titans general manager (1961-62), Jets director of player personnel (1969-71) and a Patriots scout (1971-73); and **Steve Thurlow**, *Stanford '64*, who ran for 1,127 yards and caught 61 passes for the Giants and Redskins.

Two pre-NFL pros should also be mentioned. Once ranked on the same level as Red Grange and Jim Thorpe as a runner, Frank "The Great" Goettge, Ohio '20, gained his fame in service ball. He played two seasons (1915-16) in the Ohio League (forerunner of the NFL) before entering college. When World War I broke out, he joined the Marines and became a service football legend. After his eligibility with the All-Marine team ran out in 1925, he turned down a \$10,000 offer from the New York Giants to stay in the Corps. Kent "Skeet" Lambert, Wabash '13, (brother of Basketball Hall of Fame coach "Piggy" Lambert, Wabash '11) was a star runner, passer, kicker and punter with the Fort Wayne Friars.

Canton Bulldogs, Detroit Heralds and Massillon Tigers of the Ohio League from 1913 to 1917.

Among other star pass catchers, Chris Burford, Stanford '60, had 391 catches for 5,505 yards, 55 TDs for the Dallas Texans and Kansas City Chiefs. He won All-AFL first team honors in 1962, was on the All-AFL second team in 1961 and played in the first Super Bowl. Randy Vataha, Stanford '71, caught 188 passes for 3,164 yards, 23 TDs during seven years with the Patriots and Packers. Mal Kutner, Texas '42, caught 145 passes for 3,090 vards, 31 TDs during five years with the Cardinals and was All-NFL in 1947-48. Jim Beirne, Purdue '68, had 142 catches for 2,011 yards during nine pro years (primarily with Houston) and went to one AFL All-Star Game. Tom Hall, Minnesota '62, played 96 NFL games for the Lions, Vikings and Saints, catching 103 balls for 1,441 yards. Current Bears tight end Ryan Wetnight, Stanford '93, has 134 for 1,245 yards in six seasons.

Other good offensive linemen include tackle **Gordon King**, *Stanford '78*, who played in 97 contests for the Giants and Jets; tackle **Greg Sampson**,

Stanford '72, who gained All-AFC second team honors in 1978 and also played several vears at defensive end for the Oilers; guard Bill Buckler, Alabama '25, who played 78 games for the Bears: Bill Fleckenstein, Iowa '25, who played 84 games (primarily for the Bears); guard Roy Jenson, UCLA '51, who had seven seasons with the Calgary Stampeders and British Columbia Lions; centerguard Joe Wendryhoski, Illinois '61, who played in 72 games for the BC Lions, Rams and Saints; and current San Francisco 49ers center Chris Dalman, Stanford '93.

Several defensive specialists are worthy of mention, including tackle Jason Fisk, Stanford '95, who joined the Tennessee Titans in 1999 after four years with the Vikings; tackle Del Lyman, UCLA '41, who played two NFL seasons and four years in the Pacific Coast Football League; linebacker Jim Merlo, Stanford '73, who was in 88 games over six seasons with the New Orleans Saints; linebacker Tony Visco, Purdue '88, who played four CFL years; and halfback Les Horvath, Ohio State '46, a good return specialist for the Rams

and Browns.

DON MANOUKIAN

Barger, John M., Ohio Wesleyan '79, formerly with Bankers Trust, joined the Bermudabased Latin American Reinsurance Co as Senior Vice President and General Counsel.

Berlin, Marc S, American '92, is a credentialing coordinator for the Institute for Urban Family Health, a New York City-based non-profit organization providing health services to the urban population.

Cort, Hugh, Jr., Missouri '49, was assigned the distinction of Distinguished Member of the 70th Armor Regiment, the most decorated tank unit in the U.S. Army, now part of the First Armored Division. He lives in Huntsville, Alabama.

Daley, Bernard C., Brown '86, is practicing securities law at Ulmer & Berne, LLP in Cleveland, Ohio and now resides in Shaker Heights, Ohio.

Dean, John H., Syracuse '59, has become president of Emglo Products, Lp, a leading producer of air compressors, based in Johnston, PA. He continues to compete in the track and field arena, recently taking home gold medals in the 4 x 400-meter relay, 4x-100 relay, long jump, 200 dash and 400 dash from the Keystone State Games.

Fiedler, Robert, North Dakota '74, was named executive vice president of the University of North Dakota Foundation and Alumni Association. He is a former president of the American Bankruptcy Institute, the largest entity of judges, attorneys, accountants and bankers of its kind in the world.

Finley, P. Foster, *Georgia Tech* '86, announced the birth of their son, Foster III in August. Fortier, Michel J., Purdue '42, moved from his mountaintop residence to a new home in Conway, Arkansas. A director of the company he founded, he enjoys good health and his relationship with his wife of 55 years.

Gardner, Bryan S., Idaho '86, joined Dickson Commercial Group in Reno, Nevada as an industrial consultant. His primary focus is representing distribution and/or manufacturing companies in the industrial markets of northern Nevada. He also works weekends during the winter on the Heavenly Ski Resort ski patrol on Lake Tahoe.

Gross, Charles D, Northern Michigan '70, retired after nearly 27 years of service with the Michigan State Police. His last six years were spent in the Upper Peninsula assigned to the Substance Enforcement Team, a narcotics investigation task force. Prior to his retirement the Northern Michigan University Regional Police Academy named the May '99 graduating class in his honor. He now works in various capacities with the Northern Michigan University football team.

Gustafson, Eric P., Marietta '97, graduated from the University of Massachusetts in May with an M.A. in Political Science and joined the YWCA of Western Massachusetts as its public relations and marketing coordinator.

Heller, John H., Oregon State '75, is president of the Washington-based Starwood Development and lives in Yarrow Point with his wife and two daughters.

Hise, James T., Kansas State

'89, was appointed sales manager of the Merrill Lynch Private Client Group in Kansas City.

Howell, Michael, Florida State '85, returned stateside from being overseas with the Air Force for the last seven years. He most recently moved from Ramstein AB, Germany to Sumter, South Carolina where he serves as an officer with the 9th Air Force/CENTAF at Shaw Air Force Base.

Ian, Ken, George Washington '92, recently returned from the Western Pacific/Arabian Gulf deployment aboard USS Boxer with COMPHIBRON 7, and is currently with the Nawy's Judge Adjucate General's office at NAVSTA San Diego.

Meredith, Bruce, West Virginia '60, was elected to a one-year term on the board of directors of the Civilian Marksmanship Program in Port Clinton, Ohio. Colonel Meredith retired in 1991 after a 30-year career with the U.S. Army.

Moore, Robert, Cincinnati '46, who retired as a manufacturing engineer from Ford Motor Company's Sharonville Plant, sold his Cincinnati home, relocating to his Deerfield Beach, Florida home full time. As a member of the Creative Conversation Group, he presented "The Wonders of Outer Space."

Naide, Adam, Emory '88, is vice president of marketing for nFront, a fast-growing internet banking services company based in Norcross, Georgia. Adam and his wife, Karen, announced the birth of their second child, Jared, in May.

Schrader, George, Baker '53, was elected to the Topeka High School Graduate Hall of Fame this fall. The former Dallas city manager, in recent years, Schrader has consulted on the Dallas Arts district development, serving on the Board of Directors of numerous civic and professional groups.

Sfida, Edward, Jr., Villanova '93, an Executive Recruiter for Raymond Karsan Associates in Wayne, Pennsylvania, married Christy Foster in June.

Shulman, Dan, American '96 Recently graduated from Washington University School of Law in St. Louis, MO. He was appointed as Investigative Counsel to the Transportation and Infrastructure Committee, Subcommittee on Oversight Investigation and Emergency Management, U.S. House of Representatives in Washington, DC. He currently serves as an assistant advisor and house corporation member for Theta Epsilon Chapter.

Singer, Dan, American '95, is an international sales coordinator for the Institute for Scientific Information, ISI, an electronic database publisher based in Philadelphia. Part of his responsibilities include assisting the sales manager to expand their business in Latin America and Indonesia. He married Jodi Holper in June.

Smedley, D. Robert, Central Florida '71, was promoted to Director of Computer Services for Boyle Engineering Corporation, responsible for managing the corporate information technology infrastructure systems and supporting the IT needs of Boyle's 22 branch offices.

Sparks, Grant, Oklahoma '90, became Assistant Attorney General for the state of Texas, where he will serve as a prosecutor in the Special Crimes Division.

Walker, J. Brent, Florida '72, was named executive director of the Baptist Joint Committee, a Washington, DC-based religious liberty agency. An attorney and an ordained Baptist minister, he was previously general counsel and associate executive director of the BJC and an adjunct law professor at Georgetown University Law Center.

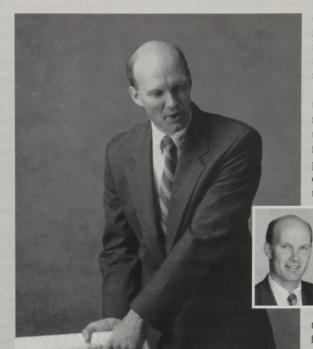

Williams, Jim, Syracuse '83, is sales and advertising manager for WNBZ/WSLK in Saranac Lake, New York. He was formerly Director of Student Activities for the University of Alabama in Birmingham. He, his wife and their two kids live in Lake Placid.

Williams, Marc, Bowling Green '90, was elected vice president of Smith-Lesher Insurance, a 55-year-old firm in Naples, Florida. Williams, who specializes in the construction and hospitality industry, was one of the top honored producers for his firm last year. He, his wife and daughter live in Naples.

Wolaver, Stephen, Miami '72, chief trial counsel in the Green County, Ohio prosecuting attorneys office, was awarded the Ohio Prosecuting Attorneys Association Outstanding Assistant Prosecutor of the Year in 1998. This honor is given yearly to one of Ohio's Assistant Prosecutors. He also practices law in Fairborn, Ohio.

Young, E.W. "Woody" II, Oklahoma '65, co-founder and principal of the Dallasbased Quest Capital Management was again listed in *Worth Magazine's* "Top 250 Financial Advisers" for 1999.

Zinn, Thomas E., West Virginia '56, retired as a Navy Commander/ Aviator and as a Flight Captain from Eastern Airlines. After his wife's death, he moved back to his hometown of Morgantown, West Virginia and accepted a position at West Virginia University's Mechanical and Aerospace Department to teach Aviation Ground School.

His Time at Bat: Team Ewing Cole's New Manager

F rom his building-standard workstation overlooking "the most historic square mile in America" abutting Philadelphia's Independence Mall, James A. Wilson, *Syracuse '79*, the young dynamo who has been a part of architectural-engineering (A/E) giant Ewing Cole Cherry Brott's history for the last 20 years, is, as its new president, out to change the course of it.

As a young graduate from Syracuse's architecture program, Wilson entered the firm through the model shop, becoming one of 31 owners in 1988 and a design studio leader before assuming the Vice President of Operations title in 1998. During his brief tenure in the latter, he reformulated the firm's operating model from one of disciplinary studios to multi-disciplinary teams. "The firm had always supported service—big projects with lots of people," said Wilson. "After arranging people geographically for a big project, it became successful and I thought, 'maybe there's something to this."

After the restructuring, the firm comprised three operational teams of approximately 60 people each which include architects, interior designers, master planning, engineers and building controls, supplemented by extensive in-house structural capabilities and other administrative and support groups. Each team has an overall team leader, augmented by a key individual responsible for design and business develop ment activities within the team.

In the two years since implementation, the initial reluctancy of being separated from the fold of like individuals has continued to diminish and people are starting to find the anticipated symbiosis of cross-disciplinary feedback to provide more creative, cost-effective solutions for the client. Still, the concept has not been without its inter-

> nal detractors. Wilson and his crew have been working harder to improve communication within and between the teams. This fosters a climate of mutual respect between the creative and analytical mentalities inherent in a firm of this type. He's also refining the incentive compensation program

to ensure an equitable balance between firm, team and individual profitability.

Integral to the firm's progress has been a shift in focus. Long reputed to be a solid, client-service driven firm with a stable of repeat clients, Wilson's management team is seeking to marry the service mentality instilled in the culture by founder Alec

Ewing, with a new focus on design creativity and innovation in every aspect of the firm's practice. In recent months, the firm has hired some extremely bright and talented young designers from the area's top schools and has given them considerable leeway in pushing the envelope of the firm's design reputation. This focus on the marriage of state of the art technical facilities with a more daring design statement is already paying off. The firm received an Honor Award from the American Institute of Architects' Philadelphia Chapter for its proposed design of the Pottruck Center on the University of Pennsylvania campus, and is a leading contender for the design of a new ballpark for the Philadelphia Phillies, a client with a deeply-rooted relationship.

One of the biggest challenges he faces, laments Wilson, is the perceived obscurity of the firm's depth and breadth of work, both domestic and abroad. While recent commissions have ranged from the \$75 million Whitehall Robins Pharmaceutical Research and Development Center in Richmond, to Kranji, a \$300 million thoroughbred racing complex in Singapore and the massive Kvaerner Shipyards project for a Norwegian client, many of the firm's clients think of Ewing Cole as a strong regional health care design firm...which it still is.

In the healthcare marketplace, Ewing Cole's strong reputation has helped it keep some client relationships that go back to the firm's founding, while adding an ever increasing list of prestigious clients to its portfolio such as Memorial Sloan Kettering and Babies and Childrens Hospital. An increased demand for elderly facilities has led to the formation of a senior living specialty where the firm not only gets involved in the design but also the development of specific projects.

Looking back, what does Wilson see as the biggest change in the firm during his tenure? "Without a doubt it's the introduction of computers," he says. "When I started we thought we were being innovative with pencils and mylar by using the overlay system. In 1985, we transitioned to computers for every project and we're investing heavily to keep us ahead of the curve on 3D graphics and web-based project management. It's clear to all of us that, in the future, geography will not be as critical as expertise."

Though his new responsibilities as president of a 260+ person firm require a major chunk of his time, Wilson still manages to stay at least 50% billable and spends a fair amount of time out in the field-especially with those clients who've gained a place in his heart. The Fox Chase Cancer Center in Philadelphia, the first project he managed with the firm, is only a mile from his boyhood home. With all his years working on projects for American Home Products, he has strong personal friendships within the company. He also finds great satisfaction in his work for the Masonic Home of New Jersev because, in his words, "they are a great client and they really care about people."

Like other people in his position, Wilson feels compelled to fuel growth through increased sales and to strengthen the brand recognition of Ewing Cole in the marketplace.

To that end, this year the company unveiled a dramatic new website, integrated with stunning new marketing materials and an aggressive promotional campaign which has already paid off with opportunities for significant new commissions in Kuwait, Brazil and Saudi Arabia. One of his other hot buttons which he is most passionate

about changing is the old adage that "A/E's can't be good designers." To that end, he's increasing his push throughout the firm for architects, interior designs and engineers-separately and together-to be constantly looking for new and better ways of solving traditional problems not only for their clients but for the firm. "In the future," he says, "innovation will be a driving force that distinguishes successful firms."

As he looks back on his life, he credits his Fraternity experience at Syracuse with strengthening many of the leadership and management skills he now uses. As vice president and then chapter president when Syracuse won the coveted Hugh Shields Award for Chapter Excellence and the University's Chancellor's Cup, he reflects on the parallels between fraternity life and that of managing Philadelphia's largest architectural firm.

"How you motivate and manage people, how you set and achieve goals, how you structure an organization into smaller groups to get higher performance...these are all things I learned in the Fraternity," he says. "As a chapter president, I thought 'this is a baseball team and I'm the manager.' I needed to support and organize the members to maximize their skills. As president of the chapter, I can run around and try to do everything myself but the chapter won't succeed. Delegating, giving people the resources they need to succeed and then holding them accountable is the secret to getting things done."

In the tough, pressure-cooker environment

of leading a multi-million dollar firm, he draws strength from those lessons he learned as an undergraduate. "When it gets tough, don't quit-there's always an answer. Don't be afraid to admit what vou don't know-seek out

the best people and learn from them."

In spite of a fulfilling undergraduate experience, Wilson's greatest fraternal memory was being part of saving the chapter at Villanova. After getting a call that the chapter was going to be closed, he helped negotiate a deal that they would, instead, go on probation and restart the chapter with a nucleus of 10 out of the original 70 people. At the time he said, "These guys are worth it. I will do whatever it takes. Here were guys who had been written off by everybody."

A chapter consultant came and agreed with Wilson. "The chapter never knew what 'National' was about. I spent many hours trying to tie them back again. A lot of those guys are still my personal friends today. One of them was in my wedding."

Today, in addition to the demands of his presidency, his weekends are filled with coaching activities for the soccer teams of his two children, and he manages to slip in a few rounds of golf every now and then. "Between family and work," he says, "that's enough."

Looking forward, Wilson plans to focus more on national expansion of his firm and using technology not only to strengthen project delivery and profitability with the firm, but to facilitate better communication between people as the firm grows. He is committed to identifying the best people emerging from area design and engineering programs, and to making Ewing Cole the "destination of choice" to come and stay for the rising stars in the professions the firm embodies. With a wisdom that belies his 42 years, Wilson says, "I believe that change is good. I don't want people to settle in. I want

Wilson, as intramural QB, and, below to left of flag, with his brothers in front of sure about what the Syracuse Delt house after winning the Hugh Shields Award.

them to come to work each day, not they're going to face."

where the set of the

From the Chairman:

It is an honor again to report to you on the Annual DeltFund and at the same time the success of ourshould I say "your"—capital campaign.

We knew when we announced the \$7.5 million capital campaign to fund an increase from 25 to 125 members who could go to the Leadership Academy and to provide for a presentation of Delts Talking About Alcohol (DTAA) to every chapter that we would have an impact on the Annual DeltFund. Well, yes and no. Let me explain.

The Annual DeltFund is the means by which we support a major portion of the costs of the Chapter Consultants and heretofore a portion of the costs of the Leadership Academy and DTAA. Over the years, by creating some of the most productive programs in the fraternity world, Delt has had the highest average gift of any fraternity and raised the largest amount of annual funds. In recent years, your annual giving has underwritten 25% of the cost of operating the Fraternity. We believe that also is the highest percentage of any fraternity.

To the support made possible by your gifts to the Annual Deltfund, we have added a portion of the earnings of our endowment funds: 5% of the market value of the funds over the trailing 12 quarters. Of course, the performance to the stock market has substantially accelerated our growth augmented by the continuing receipt of bequests and trust funds from loyal Delts who have "remembered those who follow" in their wills. Our endowment has grown from \$4 million four years ago to more than \$9 million today.

This year your generosity and the 5% from endowment has enabled us to grant \$468,426 to the Fraternity to support the Chapter Consultants, leadership and educational speakers for the Division Conferences and Karnea, the Leadership Academy and DTAA plus the development of the "Complete Delt" program, a fouryear intellectual and leadership development program for every undergraduate. The Foundation also made chapter endowment grants of \$29,958 and granted scholarships in the amount of \$37,468 for a total of \$535,852 in grants and scholarships.

With the partnership of Stephen Covey and the Covey-Franklin Institute, Delt will start a pledge on the road to a greater sense of responsibility, better time management and study planning, as well as inculcating the spirit of brotherhood from receiving the pledge pin through each year in the Fraternity to graduationand beyond. We know that every man will benefit from this detailed, balanced and progressively more demanding program. We also believe that it will assure the future of the Fraternity because we know that we depend on the alumni to make the difference by their gift of time, talent and treasure.

So, here is the donor report on the year just completed. Read it with pride. And our thanks.

Fraternally,

many Aterdian

Norval Stephens, Chairman

Bethany Society

The Bethany Society is a new category of recognition launched at the 1998 Karnea in Kansas City, specifically for the "Building On Excellence" campaign.

It recognizes a donor's lifetime giving and encourages major cash gifts of over \$25,000. To be a member of the Bethany Society, one must have pledged or given over \$25,000 as a part of a current or previous campaign or made an estate gift in excess of \$100,000.

Recipients receive a Bethany Society blazer with the Fraternity's Coat of Arms. The blazers are presented only at Karneas or at other major alumni events. There are over 60 members to date who have given over \$2.7 million in cash and committed estate gifts in excess of \$2.3 million.

Twenty-one of the blazers were presented at the 1998 Karnea. The blazers were purchased by Chairman Norval Stephens. It was his way of saying thank you to the many alumni who have brought the Foundation to its current status as well as those who are helping us write the next chapter in the Foundation's story of support for Delta Tau Delta.

Corporate Matching Gifts

Many corporations, large and small, afford Delts the opportunity through matching gift programs to double or triple their gifts to the Foundation. Below is a directory of corporations that have matched gifts to the Delt Foundation. If you are uncertain as to whether your company will match your gift to the Fraternity Foundation, a call to your personnel office should clarify this matter very quickly.

Albany International Corporation AlliedSignal Foundation American Express Foundation Aon Foundation ARCO Foundation, Inc. Atlantic Richfield Foundation Ayres Foundation, Inc. Order of The C-

Membership in the Order of The C—- is by invitation only. Members of the Order of The C—- provided gifts to the Foundation to help do the cultivation work for major gifts and planned gifts. Their goal was to raise \$100,000 for Foundation operations. This resulted in \$1.4 million in planned gifts and major gifts being produced during the year. If you are interested in becoming a member of the Order of The C—- there are still membership openings left for the 1999-00 year. Write Ken File, Executive Vice President for the Delt Foundation, or call him at 317.818.3050, for more information.

Sincere thanks to the following:

The Heritage Society

The Foundation, through the Heritage Society, recognizes those loyal Delts who have included the Foundation in their estate planning. These Delts have provided for future generations of young Delts through their gifts of life insurance, bequests, and unitrusts. We are proud to list the following Delts who are members of The Heritage Society. If you have included the Foundation in your estate planning but have not notified Foundation staff, please let them know so your name can be listed in The Heritage Society.

William G. Alhouse Laurence M.Altenburg II Charles E. Bancroft Richards D. Barger James H. Bowersox D. Scott Brennan Tyrone M. Bridges Mark R. Brown Eugene M. Busche Steven W. Chandler James L. FOUNDATION RECOGNITION FOR ANNUAL DONORS

The Foundation recognizes alumni who give more than \$250 annually to the Foundation as members of the Rainbow Society. There are five levels of giving within the Rainbow Society:

Diamond Level	\$5,000
Emerald Level	\$2,500
Ruby Level	\$1,000
Sapphire Level	\$500
Gold Level	\$250

Donors receive a very attractive lapel pin indicative of their respective club level. Lifetime giving levels are recognized in the listing of donors to the Foundation in this issue of The Rainbow. Major donors to the Delta Tau Delta Educational Foundation continue to be the backbone of the Annual DeltFund, and this loyal annual support deserves special recognition.

50 CLUB

The Foundation wishes to recognize those Delts who gave \$150-249 in response to a challenge by past International President Norval Stephens, Chairman of the Annual DeltFund. Increasing membership is important to Delta Tau Delta. Norval asked Delts who had previously given between \$50-149 to stretch and commit to giving at least \$150 annually until the year 2008 (the Fraternity's 150th year) to assist the Fraternity with those educational programs that attract quality young men and provide them with quality programs that greatly enhance their membership in Delta Tau Delta. Listed here are those Delts that qualified for the 150 Club this year.

FORMAT FOR DONOR LISTING

Next to the donor's name is a series of three numbers or two numbers and two letters. The first number is consecutive years of giving, the second number is total years of giving, and the third letter/number indicates the lifetime giving level. For instance, 0/1 would indicate a first-time donor; 16/16/4S would indicate a donor with 16 consecutive years of giving and 16 total years of giving who has attained the Four Star Council level of lifetime giving. The asterisk in the front of a name indicates the donor is a member of the Loyal Legion (15 or more years of consecutive giving). While we have attempted to produce a complete and accurate listing, oversights and errors sometimes occur. We invite corrections and notification of omissions. For your reference, below is a listing of the lifetime giving levels.

CR = Crescent Club (\$100) RB = Rainbow Club (\$250) 4S = Four Star Council (\$500) PP = Presidents Panel (\$1,000) FC = Founders Circle (\$2,500) 18 = 1858 Society (\$5,000) RP = Royal Purple Associate (\$10,000) CC = Chairman's Council (\$15,000) HS = Hugh Shields Associate (\$25,000) AS = AI Sheriff Associate (\$50,000)

OTHER WAYS

A number of Delt alumni have made provisions for the Delt Foundation by way of bequests in their wills. A bequest can take many forms such as a specific dollar amount or percentage of the total estate, or perhaps a gift of securities or real estate. If you are considering a bequest, it is advisable to consult your attorney or financial advisor. The following wording is suggested. "I hereby give, devise and bequeath to the Delta Tau Delta Educational Foundation, Inc., an Indiana Corporation, the sum of \$ to be used for the general purposes of the Foundation as the Board may direct." Gifts to the Foundation are deductible for estate tax purposes. It is an effective and lasting way to provide for the future of Delta Tau Delta. Questions and requests for further information should be directed to Ken File or Sonya Gill at the Foundation Office, 317/818-3050.

STOCK GIFTS

You may find it profitable to yourself and the Foundation to make your gift in the form of common stock. Greatly appreciated stock can be a means whereby, at low cost to the donor, a sizable gift can be made and be deducted for tax purposes at the stock's market value on the date the gift is made. Shares of stock donated may be transferred to the Delta Tau Delta Educational Foundation, Inc. This is a common transaction about which your broker can advise you, or give Sonya Gill a call at the Foundation headquarters at 317/818-3050.

The United Way and the Delt Foundation

Many of you already make donations at work through your local United Way Campaign and now there is a way that you can direct those gifts to the Delt Foundation. Most United Ways have an open donor policy. This means that you can make a donation to agencies other than the agencies that are partners with your local United Way as long as they are a 501(c)(3)charity. In many cases, the Delta Tau Delta Educational Foundation will qualify to receive your donor directed gift. Under donor choice, contributors to the United Way could designate their gifts to the Delta Tau Delta Educational Foundation. Since each United Way in the United States operates independently, we have learned that some will participate and others will not, but it is certainly worth checking into. Call your United Way or campaign representative to see if you can give to a 501(c)(3) that is headquartered in Indianapolis.

Announcing a New Way to Reach Delts

n response to steadily increasing demand from our readers for a way for Delts to reach Delts, we introduce with this issue the **Delt Marketplace.** In combination with our award-winning web site, the Fraternity now offers the opportunity for Delt-affiliated businesses to advertise products, services, jobs and events to more than 70,000 alumni and undergraduates at extremely reasonable rates.

Ads must be less than 50 words and will appear in one printed issue of the magazine and on the website for one year from date of posting—all for the low price of \$100 per ad. If the categories to the right don't fit, we would be happy to create a category to better suit your needs. The Rainbow staff reserves the right to refuse any ad for inappropriateness and ads involving sexually-related products, alcohol, tobacco or other controlled substances will not be accepted.

To place an ad, simply email your ad copy along with your name, school and year, and day time phone number to Kathy Renner at kathy.renner@delts. net or fax it to her at 317.818.3040. All ads must be pre-paid. Credit card payments are preferred. For questions or to discuss larger display advertisements, call Alan Selking at 1.800.DELTSXL.
